

CBSE AISSCE 2024 Marking Scheme for Computer Science

(Series & RQPS Sub Code: 083 Q.P. Code 91)

SET-4

Marking Scheme

Strictly Confidential

(For Internal and Restricted use only)

Senior Secondary School Certificate Examination, 2024

Subject Name: Computer Science (Q.P. CODE 91)

1	You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully.
2	“Evaluation policy is a confidential policy as it is related to the confidentiality of the examinations conducted, Evaluation done and several other aspects. Its’ leakage to public in any manner could lead to derailment of the examination system and affect the life and future of millions of candidates. Sharing this policy/document to anyone, publishing in any magazine and printing in News Paper/Website etc. may invite action under various rules of the Board and IPC.”
3	Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one’s own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and due marks be awarded to them. In class-XII, while evaluating two competency-based questions, please try to understand given answer and even if reply is not from marking scheme but correct competency is enumerated by the candidate, due marks should be awarded.
4	The Marking scheme carries only suggested value points for the answers These are in the nature of Guidelines only and do not constitute the complete answer. The students can have their own expression and if the expression is correct, the due marks should be awarded accordingly.
5	The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. If there is any variation, the same should be zero after deliberation and discussion. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
6	Evaluators will mark(✓) wherever answer is correct. For wrong answer CROSS ‘X’ be marked. Evaluators will not put right (✓)while evaluating which gives an impression that answer is correct and no marks are awarded. This is most common mistake which evaluators are committing.
7	If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totaled up and written in the left-hand margin and encircled. This may be followed strictly.
8	If a question does not have any parts, marks must be awarded in the left-hand margin and encircled. This may also be followed strictly.
9	If a student has attempted an extra question, answer of the question deserving more marks should be retained and the other answer scored out with a note “Extra Question”.
10	No marks to be deducted for the cumulative effect of an error. It should be penalized only once.
11	A full scale of marks 70 marks as given in Question Paper has to be used. Please do not hesitate to award full marks if the answer deserves it.

CBSE AISSCE 2024 Marking Scheme for Computer Science

(Series &RQPS Sub Code: 083 Q.P. Code 91)

SET-4

12	Every examiner has to necessarily do evaluation work for full working hours i.e., 8 hours every day and evaluate 20 answer books per day in main subjects and 25 answer books per day in other subjects (Details are given in Spot Guidelines). This is in view of the reduced syllabus and number of questions in question paper.
13	Ensure that you do not make the following common types of errors committed by the Examiner in the past:- <ul style="list-style-type: none">● Leaving answer or part thereof unassessed in an answer book.● Giving more marks for an answer than assigned to it.● Wrong totaling of marks awarded on an answer.● Wrong transfer of marks from the inside pages of the answer book to the title page.● Wrong question wise totaling on the title page.● Wrong totaling of marks of the two columns on the title page.● Wrong grand total.● Marks in words and figures not tallying/not same.● Wrong transfer of marks from the answer book to online award list.● Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.)● Half or a part of answer marked correct and the rest as wrong, but no marks awarded.
14	While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0) Marks.
15	Any unassessed portion, non-carrying over of marks to the title page, or totaling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
16	The Examiners should acquaint themselves with the guidelines given in the “Guidelines for Spot Evaluation” before starting the actual evaluation.
17	Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totaled and written in figures and words.
18	The candidates are entitled to obtain photocopy of the Answer Book on request on payment of the prescribed processing fee. All Examiners/Additional Head Examiners/Head Examiners are once again reminded that they must ensure that evaluation is carried out strictly as per value points for each answer as given in the Marking Scheme.

SPECIFIC INSTRUCTIONS FOR COMPUTER SCIENCE ONLY

1	In Python, string content is accepted within a pair of single quotes ' ' or within a pair of double quotes " ".
2	In MySQL, CHAR/VARCHAR/DATE type content is accepted within a pair of single quotes ' ' or within a pair of double quotes " ".
3	In MySQL commands, lowercase/UPPERCASE both are correct.
4	In MySQL output questions, column headings to be ignored.
5	In MySQL output questions, alignment (left/right) of content to be ignored.
6	All answers/codes are suggestive, any other alternative correct answers to be accepted.

CBSE AISSCE 2024 Marking Scheme for Computer Science

(Series & RQPS Sub Code: 083 Q.P. Code 91)

SET-4

General Instructions:

- (i) Please check this question paper which contains 35 questions.
- (ii) The paper is divided into 5 Sections - A, B, C, D and E.
- (iii) Section A, consists of 18 questions (1 to 18). Each question carries 1 Mark.
- (iv) Section B, consists of 7 questions (19 to 25). Each question carries 2 Marks.
- (v) Section C, consists of 5 questions (26 to 30). Each question carries 3 Marks.
- (vi) Section D, consists of 2 questions (31 to 32). Each question carries 4 Marks.
- (vii) Section E, consists of 3 questions (33 to 35). Each question carries 5 Marks.
- (viii) All programming questions are to be answered using Python Language only.

SECTION-A

1.	State True or False :		1
	While defining a function in Python, the positional parameters in the function header must always be written after the default parameters.		
Ans	False		
(1 Mark for the correct answer)			
2.	The SELECT statement when combined with ___ clause, returns records without repetition.		1
	(a) DISTINCT	(b) DESCRIBE	
	(c) UNIQUE	(d) NULL	
Ans	(a) DISTINCT		
(1 Mark for the correct answer)			
3.	What will be the output of the following statement :		1
	<code>print (16*5/4*2/5-8)</code>		
	(a) - 3.33	(b) 6.0	
	(c) 0.0	(d) -13.33	
Ans	(c) 0.0		
(1 Mark for the correct answer)			
4.	What possible output from the given options is expected to be displayed when the following Python code is executed ?		1
	<pre>import random Signal=['RED', 'YELLOW', 'GREEN'] for K in range (2, 0, - 1) : R = random.randrange(K) print (Signal[R], end = '#')</pre>		

CBSE AISSCE 2024 Marking Scheme for Computer Science

(Series & RQPS Sub Code: 083 Q.P. Code 91)

SET-4

	(a) YELLOW # RED #	(b) RED # GREEN #	
	(c) GREEN # RED #	(d) YELLOW # GREEN #	
Ans	(a) YELLOW # RED #		
(1 Mark for the correct answer)			
5.	In SQL, the aggregate function which will display the cardinality of the table is _____.		1
	(a) sum()	(b) count(*)	
	(c) avg()	(d) sum(*)	
Ans	(b) count(*)		
(1 Mark for the correct answer)			
6.	Which protocol out of the following is used to send and receive emails over a computer network ?		1
	(a) PPP	(b) HTTP	
	(c) FTP	(d) SMTP	
Ans	(d) SMTP		
(1 Mark for the correct answer)			
7.	Identify the invalid Python statement from the following :		1
	(a) d = dict()	(b) e = {}	
	(c) f = []	(d) g = dict{}	
Ans	(d) g = dict{}		
(1 Mark for the correct answer)			
8.	Consider the statements given below and then choose the correct output from the given options : <pre>myStr = "MISSISSIPPI" print(myStr[:4]+"#" + myStr[-5:])</pre>		1
	(a) MISSI#SIPPI	(b) MISS#SIPPI	
	(c) MISS#IPPIS	(d) MISSI#IPPIS	
Ans	(b) MISS#SIPPI		
(1 Mark for the correct answer)			
9.	Identify the statement from the following which will raise an error :		1
	(a) print("A"*3)	(b) print(5*3)	
	(c) print("15" + 3)	(d) print("15" + "13")	

CBSE AISSCE 2024 Marking Scheme for Computer Science

(Series &RQPS Sub Code: 083 Q.P. Code 91)

SET-4

Ans	(C)	<code>print("15" + 3)</code>		
<i>(1 Mark for the correct answer)</i>				
10.	Select the correct output of the following code :			1
<pre> event="G20 Presidency@2023" L=event.split(' ') print(L[:-2]) </pre>				
	(a)	'G20'	(b)	['Presidency@2023']
	(c)	['G20']	(d)	'Presidency@2023'
Ans	(b)	['Presidency@2023']		
<i>(1 Mark for the correct answer)</i>				
11.	Which of the following options is the correct unit of measurement for network bandwidth ?			1
	(a)	KB	(b)	Bit
	(c)	Hz	(d)	Km
Ans	(c)	Hz		
<i>(1 Mark for the correct answer)</i>				
12.	Observe the given Python code carefully :			1
<pre> a=20 def convert(a): b=20 a=a+b convert(10) print(a) </pre>				
Select the correct output from the given options :				
	(a)	10	(b)	20
	(c)	30	(d)	Error
Ans	(b)	20		
<i>(1 Mark for the correct answer)</i>				
13.	State whether the following statement is True or False: While handling exceptions in Python, name of the exception has to be compulsorily added with except clause.			1
Ans	False			
<i>(1 Mark for the correct answer)</i>				

CBSE AISSCE 2024 Marking Scheme for Computer Science

(Series & RQPS Sub Code: 083 Q.P. Code 91)

SET-4

14.	Which of the following is not a DDL command in SQL ?			1
	(a)	DROP	(b)	CREATE
	(c)	UPDATE	(d)	ALTER
Ans	(c)	UPDATE		
<i>(1 Mark for the correct answer)</i>				
15.	Fill in the blank : _____ is a set of rules that needs to be followed by the communicating parties in order to have a successful and reliable data communication over a network.			1
Ans	Protocol OR Name of any protocol			
<i>(1 Mark for the correct answer as protocol or name of any protocol)</i>				
16.	Consider the following Python statement : <code>F=open (' CONTENT . TXT ')</code> Which of the following is an invalid statement in Python ?			1
	(a)	<code>F.seek (1 , 0)</code>	(b)	<code>F.seek (0 , 1)</code>
	(c)	<code>F.seek (0 , -1)</code>	(d)	<code>F.seek (0 , 2)</code>
Ans	(c)	<code>F.seek (0 , -1)</code>		
<i>(1 Mark for the correct answer)</i>				
Q. 17 and 18 are ASSERTION (A) and REASONING (R) based questions. Mark the correct choice as				
	(a)	Both (A) and (R) are true and (R) is the correct explanation for (A).		
	(b)	Both (A) and (R) are true and (R) is not the correct explanation for (A).		
	(c)	(A) is true but (R) is false.		
	(d)	(A) is false but (R) is true.		
17	Assertion (A) : CSV file is a human readable text file where each line has a number of fields, separated by comma or some other delimiter. Reason (R): <code>writerow()</code> method is used to write a single row in a CSV file.			1
Ans	(b)	Both (A) and (R) are true and (R) is not the correct explanation for (A).		
<i>(1 Mark for the correct answer)</i>				
18	Assertion (A): The expression <code>"Hello".sort()</code> in Python will give an error. Reason (R): <code>sort()</code> does not exist as a method/function for strings in Python.			1

CBSE AISSCE 2024 Marking Scheme for Computer Science

(Series & RQPS Sub Code: 083 Q.P. Code 91)

SET-4

Ans	(a)	Both (A) and (R) are true and (R) is the correct explanation for (A).	
		<i>(1 Mark for the correct answer)</i>	

SECTION-B

19	(A)	(i) Expand the following terms: XML , PPP (ii) Give one difference between circuit switching and packet switching.	2				
		OR					
	(B)	(i) Define the term web hosting. (ii) Name any two web browsers.					
Ans	(A)	(i) eXtensible Markup Language Point-to-Point Protocol					
		(½ Mark for writing correct expansion of XML) (½ Mark for writing correct expansion of PPP)					
Ans		(ii) <table border="1" style="width: 100%; margin-top: 10px;"> <thead> <tr> <th style="width: 50%;">Circuit Switching</th> <th style="width: 50%;">Packet Switching</th> </tr> </thead> <tbody> <tr> <td>A dedicated path is established between the sender and the receiver before starting data transmission. Entire data is transmitted in one go.</td> <td>Data to be transmitted is divided into small packets which are transmitted via nearest service provider till all packets reach the recipient where the packets are reassembled.</td> </tr> </tbody> </table>	Circuit Switching	Packet Switching	A dedicated path is established between the sender and the receiver before starting data transmission. Entire data is transmitted in one go.	Data to be transmitted is divided into small packets which are transmitted via nearest service provider till all packets reach the recipient where the packets are reassembled.	
Circuit Switching	Packet Switching						
A dedicated path is established between the sender and the receiver before starting data transmission. Entire data is transmitted in one go.	Data to be transmitted is divided into small packets which are transmitted via nearest service provider till all packets reach the recipient where the packets are reassembled.						
		(½ Mark for writing correct technique for Circuit Switching) (½ Mark for writing correct technique for Packet Switching)					
		OR					
Ans	(B)	(i) Web hosting is a service that allows users to put a website or a webpage onto the internet, and make it a part of the World Wide Web.					
		<i>(1 Mark for writing the correct definition of Web hosting)</i>					
		(ii) Google Chrome, Microsoft Edge, Safari, Mozilla Firefox, Opera etc.					
		<i>(1 mark for writing names of any two web browsers)</i>					
20		The code given below accepts five numbers and displays whether they are even or odd: Observe the following code carefully and rewrite it after removing all syntax and logical errors : Underline all the corrections made. <pre> def EvenOdd() for i in range(5) : num=int(input("Enter a number")) if num/2==0: print("Even") else: print("Odd") EvenOdd() </pre>	2				

CBSE AISSCE 2024 Marking Scheme for Computer Science

(Series & RQPS Sub Code: 083 Q.P. Code 91)

SET-4

Ans		<pre>def EvenOdd(): for i in range(5): num=int(input("Enter a number")) if num%2==0: print("Even") else: print("Odd") EvenOdd()</pre> <p style="text-align: right; margin-right: 20px;"># Error 1 # Error 2 # Error 3 # Error 4</p>									
		<i>(½ Mark for each correction made)</i>									
21.	(A)	<p>Write a user defined function in Python named showGrades(S) which takes the dictionary S as an argument. The dictionary, S contains Name:[Eng,Math,Science] as key:value pairs. The function displays the corresponding grade obtained by the students according to the following grading rules :</p> <table border="1" style="margin: 10px auto; border-collapse: collapse; text-align: center;"> <thead> <tr> <th style="padding: 5px;">Average of Eng, Math, Science</th> <th style="padding: 5px;">Grade</th> </tr> </thead> <tbody> <tr> <td style="padding: 5px;">>=90</td> <td style="padding: 5px;">A</td> </tr> <tr> <td style="padding: 5px;"><90 but >=60</td> <td style="padding: 5px;">B</td> </tr> <tr> <td style="padding: 5px;"><60</td> <td style="padding: 5px;">C</td> </tr> </tbody> </table> <p>For example : Consider the following dictionary S={ "AMIT" : [92 , 86 , 64] , "NAGMA" : [65 , 42 , 43] , "DAVID" : [92 , 90 , 88] } The output should be : AMIT - B NAGMA - C DAVID - A</p>	Average of Eng, Math, Science	Grade	>=90	A	<90 but >=60	B	<60	C	2
Average of Eng, Math, Science	Grade										
>=90	A										
<90 but >=60	B										
<60	C										
Ans		<pre>def showGrades(S): for K, V in S.items(): if sum(V)/3>=90: Grade="A" elif sum(V)/3>=60: Grade="B" else: Grade="C" print(K, "-", Grade) S={ "AMIT" : [92 , 86 , 64] , "NAGMA" : [65 , 42 , 43] , "DAVID" : [92 , 90 , 88] } showGrades(S)</pre> <p>OR</p> <pre>def showGrades(S): for K in S: Sum=0 for i in range(3): Sum+=S[K][i] if Sum/3>=90: Grade="A" elif Sum/3>=60: Grade="B" else: Grade="C" print(K, "-", Grade) S={ "AMIT" : [92 , 86 , 64] , "NAGMA" : [65 , 42 , 43] , "DAVID" : [92 , 90 , 88] } showGrades(S)</pre>									

CBSE AISSCE 2024 Marking Scheme for Computer Science

(Series &RQPS Sub Code: 083 Q.P. Code 91)

SET-4

		<p>OR</p> <p>Any other correct variation of the code</p>	
		<p><i>(½ Mark for the loop to process individual students from the dictionary)</i></p> <p><i>(1 Mark for calculating grades)</i></p> <p><i>(½ Mark for displaying grades)</i></p>	
		<p>OR</p>	
	(B)	<p>Write a user defined function in Python named Puzzle(W,N) which takes the argument W as an English word and N as an integer and returns the string where every Nth alphabet of the word W is replaced with an underscore ("_").</p> <p>For example : if W contains the word "TELEVISION" and N is 3, then the function should return the string "TE_EV_SI_N". Likewise for the word "TELEVISION" if N is 4, then the function should return "TEL_VIS_ON".</p>	
Ans		<pre> Word="TELEVISION" def Puzzle(W, N): NW="" Count=1 for Ch in W: if Count!=N: NW+=Ch Count+=1 else: NW+="_" Count=1 return NW print(Puzzle(Word,3)) OR def Puzzle(W,N): W1="" for i in range(len(W)): if (i+1)%N==0: W1=W1+"_" else: W1=W1+W[i] return W1 print(Puzzle("TELEVISION",4)) OR Any other correct variation of the code </pre>	
		<p><i>(½ Mark for the loop to process individual (or Nth) characters)</i></p> <p><i>(1 Mark for changing/replacing the required characters)</i></p> <p><i>(½ Mark for returning the new word)</i></p>	
22.		<p>Write the output displayed on execution of the following Python code :</p> <pre> LS=["HIMALAYA", "NILGIRI", "ALASKA", "ALPS"] D={} for S in LS : if len(S)%4 == 0: D[S] = len(S) for K in D : print(K,D[K], sep = "#") </pre>	<p>2</p>

CBSE AISSCE 2024 Marking Scheme for Computer Science

(Series &RQPS Sub Code: 083 Q.P. Code 91)

SET-4

Ans		HIMALAYA#8 ALPS#4	
		<i>(1 Mark for each line of output)</i> <i>(Deduct ½ Mark if the entire output is correct but the formatting or line break or separating characters is/are incorrect)</i>	
23.	(A)	<p>Write the Python statement for each of the following tasks using built-in functions/methods only :</p> <p>(i) To remove the item whose key is "NISHA" from a dictionary named Students . For example, if the dictionary Students contains {"ANITA": 90, "NISHA": 76, "ASHA": 92}, then after removal the dictionary should contain {"ANITA": 90, "ASHA": 92 }</p> <p>(ii) To display the number of occurrences of the substring "is" in a string named message . For example if the string message contains "This is his book", then the output will be 3.</p>	1+1=2
Ans	(A)	<p>(i) <code>Students.pop("NISHA")</code> OR <code>del (Students["NISHA"])</code> OR <code>del Students["NISHA"]</code> OR Any other correct variation of the code</p> <p>(ii) <code>print(message.count("is"))</code> OR <code>message.count("is")</code> OR Any other correct variation of the code</p>	
		<i>(1 Mark for each correct command)</i>	
		OR	
	(B)	<p>A tuple named subject stores the names of different subjects. Write the Python commands to convert the given tuple to a list and thereafter delete the last element of the list.</p>	
Ans	(B)	<pre>subject=list(subject) subject.pop() OR subject=list(subject) subject.pop(-1) OR subject=list(subject) del (subject[-1]) OR subject=list(subject) del subject[-1]</pre>

SECTION-E

33	<p>Infotainment Ltd. is an event management company with its prime office located in Bengaluru. The company is planning to open its new division at three different locations in Chennai named as - Vajra, Trishula and Sudershana. You, as a networking expert need to suggest solutions to the questions in part (i) to (v), keeping in mind the distances and other given parameters.</p>	1x5 =5
----	--	-----------

CBSE AISSCE 2024 Marking Scheme for Computer Science

(Series & RQPS Sub Code: 083 Q.P. Code 91)

SET-4

Distances between various locations:

Vajra to Trishula	350 m
Trishula to Sudershana	415 m
Sudershana to Vajra	300 m
Bengaluru Office to Chennai	2000 km

Number of Computers installed at various locations :

Vajra	120
Sudershana	75
Trishula	65
Bengaluru Office	250

- (i) Suggest and draw the cable layout to efficiently connect various locations in Chennai division for connecting the digital devices.

Ans

(Full 1 Mark for drawing any valid layout with OR without mentioning topology)

OR

(Only ½ mark for mentioning only topology without cable layout)

CBSE AISSCE 2024 Marking Scheme for Computer Science

(Series &RQPS Sub Code: 083 Q.P. Code 91)

SET-4

	(ii)	Which block in Chennai division should host the server? Justify your answer.	
Ans		Vajra can host the server as it has a maximum number of computers. OR Any other answer with valid justification	
		<i>(½ Mark for the correct answer)</i> <i>(½ Mark for the correct justification)</i>	
	(iii)	Which fast and effective wired transmission medium should be used to connect the prime office at Bengaluru with the Chennai division?	
Ans		Optical Fiber	
		<i>(1 Mark for the correct answer)</i>	
	(iv)	Which network device will be used to connect the digital devices within each location of Chennai division so that they may communicate with each other ?	
Ans		Switch/Hub/Router	
		<i>(1 Mark for the correct answer)</i>	
	(v)	A considerable amount of data loss is noticed between the different locations of the Chennai division, which are connected in the network. Suggest a networking device that should be installed to refresh the data and reduce the data loss during transmission to and from different locations of Chennai division.	
Ans		Repeater OR Mentioning any other valid reason or solution for data loss	
		<i>(1 Mark for the correct answer)</i>	
34	(A)	(i) Differentiate between 'w' and 'a' file modes in Python.	2+3 =5
Ans		'w': Open the file in write mode. If the file doesn't exist, then a new file will be created. The file pointer is in the beginning of the file. If the file exists, the contents of the file, if any, are lost/truncated and the new data is added as fresh data into the file. 'a': Open the file in append mode. If the file doesn't exist, then a new file will be created. The file pointer is at the end of the file. If the file exists, the new data is added at the end of the file without deleting the previous contents of the file.	
		<i>(1 Mark each for any one correct characteristics of 'w' mode)</i>
