DATA INTERPRETATION AND LOGICAL REASONING-Set 2-Questions
Answer the questions based on the information below.

A group of five boys - A, B, C, D and E and five girls - P, Q, R, S and are standing in rows facing each other (not necessarily in the stated order). The group of girls is facing north.

E is not standing at any of the ends. C is immediately to the right of B and D is immediately to the left of A. Moreover, A is facing P. The number of girls between P and Q is the same as those between R and S. R and S are not facing either B or D. Finally, A is second to the left of B.

1. Which pair of boys is standing at the ends of the boy's row ?

    A. C and D
    B. A and B
    C. B and D
    D. Inadequate data
