

GRE VERBAL PRACTICE PAPER

READING COMPREHENSION

Q.1

PASSAGE:Recent years have brought minority-owned businesses in the United States unprecedented opportunities—as well as new and significant risks. Civil rights activists have long argued that one of the principal reasons why Blacks, Hispanics and the other minority groups have difficulty establishing themselves in business is that they lack access to the sizable orders and subcontracts that are generated by large companies. Now congress, in apparent agreement, has required by law that businesses awarded federal contracts of more than \$500,000 do their best to find minority subcontractors and record their efforts to do so on forms filed with the government. Indeed, some federal and local agencies have gone so far as to set specific percentage goals for apportioning parts of public works contracts to minority enterprises.

Corporate response appears to have been substantial. According to figures collected in 1977, the total of corporate contracts with minority business rose from \$77 to \$1.1 billion in 1977. The projected total of corporate contracts with minority business for the early 1980's is estimated to be over \$3 billion per year with no letup anticipated in the next decade. Promising as it is for minority businesses, this increased patronage poses dangers for them, too. First, minority firms risk expanding too fast and overextending themselves financially, since most are small concerns and, unlike large businesses they often need to make substantial investments in new plants, staff, equipment, and the like in order to perform work subcontracted to them. If, there after, their subcontracts are for some reason reduced, such firms can face potentially crippling fixed expenses. The world of corporate purchasing can be frustrating for small entrepreneur's who get requests for elaborate formal estimates and bids. Both consume valuable time and resources and a small company's efforts must soon result in orders, or both the morale and the financial health of the business will suffer.

A second risk is that White-owned companies may seek to cash in on the increasing apportionments through formation of joint ventures with minority-owned concerns, of course, in many instances there are legitimate reasons for joint ventures; clearly, white and minority enterprises can team up to acquire business that neither could Third, a minority enterprise that secures the business of one large corporate customer often runs the danger of becoming – and remaining dependent. Even in the best of circumstances, fierce competition from larger, more established companies makes it difficult for small concerns to broaden their customer bases; when such firms have nearly guaranteed orders from a single corporate benefactor, they may truly have to struggle against complacency arising from their current success.

The primary purpose of the passage is to

- A. present a commonplace idea and its inaccuracies

- B.describe a situation and its potential drawbacks
- C.propose a temporary solution to a problem
- D.analyze a frequent source to a problem
- E.explore the implications of a findings.

Q.2

PASSAGE:Recent years have brought minority-owned businesses in the United States unprecedented opportunities-as well as new and significant risks. Civil rights activists have long argued that one of the principal reasons why Blacks, Hispanics and the other minority groups have difficulty establishing themselves in business is that they lack access to the sizable orders and subcontracts that are generated by large companies. Now congress, in apparent agreement, has required by law that businesses awarded federal contracts of more than \$500,000 do their best to find minority subcontractors and record their efforts to do so on forms filed with the government. Indeed, some federal and local agencies have gone so far as to set specific percentage goals for apportioning parts of public works contracts to minority enterprises.

Corporate response appears to have been substantial. According to figures collected in 1977, the total of corporate contracts with minority business rose from \$77 to \$1.1 billion in 1977. The projected total of corporate contracts with minority business for the early 1980's is estimated to be over \$3 billion per year with no letup anticipated in the next decade. Promising as it is for minority businesses, this increased patronage poses dangers for them, too. First, minority firms risk expanding too fast and overextending themselves financially, since most are small concerns and, unlike large businesses they often need to make substantial investments in new plants, staff, equipment, and the like in order to perform work subcontracted to them. If, there after, their subcontracts are for some reason reduced, such firms can face potentially crippling fixed expenses. The world of corporate purchasing can be frustrating for small entrepreneur's who get requests for elaborate formal estimates and bids. Both consume valuable time and resources and a small company's efforts must soon result in orders, or both the morale and the financial health of the business will suffer.

A second risk is that White-owned companies may seek to cash in on the increasing apportionments through formation of joint ventures with minority-owned concerns, of course, in many instances there are legitimate reasons for joint ventures; clearly, white and minority enterprises can team up to acquire business that neither could. Third, a minority enterprise that secures the business of one large corporate customer often runs the danger of becoming – and remaining dependent. Even in the best of circumstances, fierce competition from larger, more established companies makes it difficult for small concerns to broaden their customer bases; when such firms have nearly guaranteed orders from a single corporate benefactor, they may truly have to struggle against complacency arising from their current success.

The passage supplies information that would answer which of the following questions?

- A. What federal agencies have set percentage goals for the use of minority owned businesses in public works contracts?
- B. To which governments agencies must businesses awarded federal contracts report their efforts to find minority subcontractors?
- C. How widespread is the use of minority-owned concerns as “fronts; by White backers seeking to obtain subcontracts?
- D. How many more minority owned businesses were there in 1977 than in 1972?
- E. What is one set of conditions under which a small business might find itself financially overextended?

Q.3

PASSAGE:Recent years have brought minority-owned businesses in the United States unprecedented opportunities—as well as new and significant risks. Civil rights activists have long argued that one of the principal reasons why Blacks, Hispanics and the other minority groups have difficulty establishing themselves in business is that they lack access to the sizable orders and subcontracts that are generated by large companies. Now congress, in apparent agreement, has required by law that businesses awarded federal contracts of more than \$500,000 do their best to find minority subcontractors and record their efforts to do so on forms filed with the government. Indeed, some federal and local agencies have gone so far as to set specific percentage goals for apportioning parts of public works contracts to minority enterprises.

Corporate response appears to have been substantial. According to figures collected in 1977, the total of corporate contracts with minority business rose from \$77 to \$1.1 billion in 1977. The projected total of corporate contracts with minority business for the early 1980's is estimated to be over \$3 billion per year with no letup anticipated in the next decade. Promising as it is for minority businesses, this increased patronage poses dangers for them, too. First, minority firms risk expanding too fast and overextending themselves financially, since most are small concerns and, unlike large businesses they often need to make substantial investments in new plants, staff, equipment, and the like in order to perform work subcontracted to them. If, there after, their subcontracts are for some reason reduced, such firms can face potentially crippling fixed expenses. The world of corporate purchasing can be frustrating for small entrepreneur's who get requests for elaborate formal estimates and bids. Both consume valuable time and resources and a small company's efforts must soon result in orders, or both the morale and the financial health of the business will suffer.

A second risk is that White-owned companies may seek to cash in on the increasing apportionments through formation of joint ventures with minority-owned concerns, of course, in many instances there are legitimate reasons for joint ventures; clearly, white and minority enterprises can team up to acquire business that neither could Third, a minority enterprise that secures the business of one large

corporate customer often runs the danger of becoming – and remaining dependent. Even in the best of circumstances, fierce competition from larger, more established companies makes it difficult for small concerns to broaden their customer bases; when such firms have nearly guaranteed orders from a single corporate benefactor, they may truly have to struggle against complacency arising from their current success.

According to the passage, civil rights activists maintain that one disadvantage under which minority owned businesses have traditionally had to labor is that they have

- A.been specially vulnerable to governmental
- B.been denied bank loans at rates comparable to those afforded larger competitors
- C.not had sufficient opportunity to secure businesses created by large corporations
- D.not been able to advertise in those media that reach large numbers of potential customers
- E.not had adequate representation in the centers of government power.

Q.4

PASSAGE:Recent years have brought minority-owned businesses in the United States unprecedented opportunities-as well as new and significant risks. Civil rights activists have long argued that one of the principal reasons why Blacks, Hispanics and the other minority groups have difficulty establishing themselves in business is that they lack access to the sizable orders and subcontracts that are generated by large companies. Now congress, in apparent agreement, has required by law that businesses awarded federal contracts of more than \$500,000 do their best to find minority subcontractors and record their efforts to do so on forms field with the government. Indeed, some federal and local agencies have gone so far as to set specific percentage goals for apportioning parts of public works contracts to minority enterprises.

Corporate response appears to have been substantial. Accoring to figures collected in 1977, the total of corporate contracts with minority business rose from \$77 to \$1. 1 billion in 1977. The projected total of corporate contracts with minority business for the early 1980's is estimated to be over \$3 billion per year with no letup anticipated in the next decade. Promising as it is for minority businesses, this increased patronage poses dangers for them, too. First, minority firms risk expanding too fast and overextending themselves financially, since most are small concerns and, unlike large businesses they often need to make substantial investments in new plants, staff, equipment, and the like in order to perform work subcontracted to them. If, there after, their subcontracts are for some reason reduced, such firms can face potentially crippling fixed expenses. The world of corporate purchasing can be frustrating for small entrepreneur's who get requests for elaborate formal estimates and bids. Both consume valuable time and resources and a small cmpany's efforts must soon result in orders, or both the morale and the financial health of the business will suffer.

A second risk is that White-owned companies may seek to cash in on the increasing apportionments through formation of joint ventures with minority-owned concerns, of course, in many instances there are legitimate reasons for joint ventures; clearly, white and minority enterprises can team up to acquire business that neither could. Third, a minority enterprise that secures the business of one large corporate customer often runs the danger of becoming – and remaining dependent. Even in the best of circumstances, fierce competition from larger, more established companies makes it difficult for small concerns to broaden their customer bases; when such firms have nearly guaranteed orders from a single corporate benefactor, they may truly have to struggle against complacency arising from their current success.

The passage suggests that the failure of a large business to have its bids for subcontracts results quickly in order might cause it to

- A. experience frustrations but not serious financial harm
- B. face potentially crippling fixed expenses
- C. have to record its efforts on forms filed with the government
- D. increase its spending with minority subcontractors
- E. revise its procedure for making bids for federal contracts and subcontracts

Q.5

PASSAGE:Recent years have brought minority-owned businesses in the United States unprecedented opportunities—as well as new and significant risks. Civil rights activists have long argued that one of the principal reasons why Blacks, Hispanics and the other minority groups have difficulty establishing themselves in business is that they lack access to the sizable orders and subcontracts that are generated by large companies. Now congress, in apparent agreement, has required by law that businesses awarded federal contracts of more than \$500,000 do their best to find minority subcontractors and record their efforts to do so on forms filed with the government. Indeed, some federal and local agencies have gone so far as to set specific percentage goals for apportioning parts of public works contracts to minority enterprises.

Corporate response appears to have been substantial. According to figures collected in 1977, the total of corporate contracts with minority business rose from \$77 to \$1.1 billion in 1977. The projected total of corporate contracts with minority business for the early 1980's is estimated to be over \$3 billion per year with no letup anticipated in the next decade. Promising as it is for minority businesses, this increased patronage poses dangers for them, too. First, minority firms risk expanding too fast and overextending themselves financially, since most are small concerns and, unlike large businesses they often need to make substantial investments in new plants, staff, equipment, and the like in order to perform work subcontracted to them. If, thereafter, their subcontracts are for some reason reduced, such firms can face potentially crippling fixed expenses. The world of corporate purchasing can be frustrating for small entrepreneur's who get requests for elaborate formal estimates and bids. Both

consume valuable time and resources and a small company's efforts must soon result in orders, or both the morale and the financial health of the business will suffer.

A second risk is that White-owned companies may seek to cash in on the increasing apportionments through formation of joint ventures with minority-owned concerns, of course, in many instances there are legitimate reasons for joint ventures; clearly, white and minority enterprises can team up to acquire business that neither could Third, a minority enterprise that secures the business of one large corporate customer often runs the danger of becoming – and remaining dependent. Even in the best of circumstances, fierce competition from larger, more established companies makes it difficult for small concerns to broaden their customer bases; when such firms have nearly guaranteed orders from a single corporate benefactor, they may truly have to struggle against complacency arising from their current success.

The authors implied that the minority owned concern that does the greater part of its business with one large corporate customer should

- A. avoid competition with the larger, more established concerns by not expanding
- B. concentrate on securing even more business from that corporation
- C. try to expand its customers base to avoid becoming dependent on the corporation
- D. pass on some of the work to be done for the corporation to other minority owned concerns.
- E. use its influence with the other corporation to promote subcontracting with other minority concerns.

Q.6

PASSAGE:Recent years have brought minority-owned businesses in the United States unprecedented opportunities—as well as new and significant risks. Civil rights activists have long argued that one of the principal reasons why Blacks, Hispanics and the other minority groups have difficulty establishing themselves in business is that they lack access to the sizable orders and subcontracts that are generated by large companies. Now congress, in apparent agreement, has required by law that businesses awarded federal contracts of more than \$500,000 do their best to find minority subcontractors and record their efforts to do so on forms filed with the government. Indeed, some federal and local agencies have gone so far as to set specific percentage goals for apportioning parts of public works contracts to minority enterprises.

Corporate response appears to have been substantial. According to figures collected in 1977, the total of corporate contracts with minority business rose from \$77 to \$1.1 billion in 1977. The projected total of corporate contracts with minority business for the early 1980's is estimated to be over \$3 billion per year with no letup anticipated in the next decade. Promising as it is for minority businesses, this increased patronage poses dangers for them, too. First, minority firms risk expanding too fast and overextending themselves financially, since most are small concerns and, unlike large businesses they

often need to make substantial investments in new plants, staff, equipment, and the like in order to perform work subcontracted to them. If, there after, their subcontracts are for some reason reduced, such firms can face potentially crippling fixed expenses. The world of corporate purchasing can be frustrating for small entrepreneur's who get requests for elaborate formal estimates and bids. Both consume valuable time and resources and a small company's efforts must soon result in orders, or both the morale and the financial health of the business will suffer.

A second risk is that White-owned companies may seek to cash in on the increasing apportionments through formation of joint ventures with minority-owned concerns, of course, in many instances there are legitimate reasons for joint ventures; clearly, white and minority enterprises can team up to acquire business that neither could Third, a minority enterprise that secures the business of one large corporate customer often runs the danger of becoming – and remaining dependent. Even in the best of circumstances, fierce competition from larger, more established companies makes it difficult for small concerns to broaden their customer bases; when such firms have nearly guaranteed orders from a single corporate benefactor, they may truly have to struggle against complacency arising from their current success.

It can be inferred from the passage that, compared with the requirements of law, the percentage goals set by “some federal and local agencies” are

- A.more popular with large corporations
- B.more specific
- C.less controversial
- D.less expensive to enforce
- E.easier to comply with

Q.7

Recent years have brought minority-owned businesses in the United States unprecedented opportunities-as well as new and significant risks. Civil rights activists have long argued that one of the principal reasons why Blacks, Hispanics and the other minority groups have difficulty establishing themselves in business is that they lack access to the sizable orders and subcontracts that are generated by large companies. Now congress, in apparent agreement, has required by law that businesses awarded federal contracts of more than \$500,000 do their best to find minority subcontractors and record their efforts to do so on forms filed with the government. Indeed, some federal and local agencies have gone so far as to set specific percentage goals for apportioning parts of public works contracts to minority enterprises.

Corporate response appears to have been substantial. According to figures collected in 1977, the total of corporate contracts with minority business rose from \$77 to \$1.1 billion in 1977. The projected

total of corporate contracts with minority business for the early 1980's is estimated to be over \$3 billion per year with no letup anticipated in the next decade. Promising as it is for minority businesses, this increased patronage poses dangers for them, too. First, minority firms risk expanding too fast and overextending themselves financially, since most are small concerns and, unlike large businesses they often need to make substantial investments in new plants, staff, equipment, and the like in order to perform work subcontracted to them. If, there after, their subcontracts are for some reason reduced, such firms can face potentially crippling fixed expenses. The world of corporate purchasing can be frustrating for small entrepreneur's who get requests for elaborate formal estimates and bids. Both consume valuable time and resources and a small company's efforts must soon result in orders, or both the morale and the financial health of the business will suffer.

A second risk is that White-owned companies may seek to cash in on the increasing apportionments through formation of joint ventures with minority-owned concerns, of course, in many instances there are legitimate reasons for joint ventures; clearly, white and minority enterprises can team up to acquire business that neither could. Third, a minority enterprise that secures the business of one large corporate customer often runs the danger of becoming – and remaining dependent. Even in the best of circumstances, fierce competition from larger, more established companies makes it difficult for small concerns to broaden their customer bases; when such firms have nearly guaranteed orders from a single corporate benefactor, they may truly have to struggle against complacency arising from their current success.

Which of the following if true, would most weaken the author's assertion that, in 1970's, corporate response to federal requirements (lines 18-19) was substantial?

- A. Corporate contracts with minority owned business totaled about \$2 billion in 1979
- B. Between 1970 and 1972, corporate contracts with minority owned businesses declined by 25 percent
- C. The figures collected 1977 underrepresented the extent of corporate contracts with minority owned businesses.
- D. The estimate of corporate spending with minority owned businesses in 1980 is approximately \$10 million too high
- E. The \$1.1 billion represented the same percentage of total corporate spending in 1977 as did \$77 million in 1972.

Q.8

PASSAGE:Recent years have brought minority-owned businesses in the United States unprecedented opportunities—as well as new and significant risks. Civil rights activists have long argued that one of the principal reasons why Blacks, Hispanics and the other minority groups have difficulty establishing themselves in business is that they lack access to the sizable orders and subcontracts that are generated by large companies. Now congress, in apparent agreement, has required by law that businesses awarded federal contracts of more than \$500,000 do their best to find minority subcontractors and record their efforts to do so on forms filed with the government. Indeed, some

federal and local agencies have gone so far as to set specific percentage goals for apportioning parts of public works contracts to minority enterprises.

Corporate response appears to have been substantial. According to figures collected in 1977, the total of corporate contracts with minority business rose from \$77 to \$1.1 billion in 1977. The projected total of corporate contracts with minority business for the early 1980's is estimated to be over \$3 billion per year with no letup anticipated in the next decade. Promising as it is for minority businesses, this increased patronage poses dangers for them, too. First, minority firms risk expanding too fast and overextending themselves financially, since most are small concerns and, unlike large businesses they often need to make substantial investments in new plants, staff, equipment, and the like in order to perform work subcontracted to them. If, thereafter, their subcontracts are for some reason reduced, such firms can face potentially crippling fixed expenses. The world of corporate purchasing can be frustrating for small entrepreneur's who get requests for elaborate formal estimates and bids. Both consume valuable time and resources and a small company's efforts must soon result in orders, or both the morale and the financial health of the business will suffer.

A second risk is that White-owned companies may seek to cash in on the increasing apportionments through formation of joint ventures with minority-owned concerns, of course, in many instances there are legitimate reasons for joint ventures; clearly, white and minority enterprises can team up to acquire business that neither could. Third, a minority enterprise that secures the business of one large corporate customer often runs the danger of becoming – and remaining dependent. Even in the best of circumstances, fierce competition from larger, more established companies makes it difficult for small concerns to broaden their customer bases; when such firms have nearly guaranteed orders from a single corporate benefactor, they may truly have to struggle against complacency arising from their current success.

The passage most likely appeared in

- A. a business magazine
- B. an encyclopedia of black history to 1945
- C. a dictionary of financial terms
- D. a yearbook of business statistics
- E. an accounting textbook

Q.9

PASSAGE:Recent years have brought minority-owned businesses in the United States unprecedented opportunities—as well as new and significant risks. Civil rights activists have long argued that one of the principal reasons why Blacks, Hispanics and the other minority groups have difficulty establishing themselves in business is that they lack access to the sizable orders and subcontracts that are generated by large companies. Now congress, in apparent agreement, has required by law that

businesses awarded federal contracts of more than \$500,000 do their best to find minority subcontractors and record their efforts to do so on forms filed with the government. Indeed, some federal and local agencies have gone so far as to set specific percentage goals for apportioning parts of public works contracts to minority enterprises.

Corporate response appears to have been substantial. According to figures collected in 1977, the total of corporate contracts with minority business rose from \$77 to \$1.1 billion in 1977. The projected total of corporate contracts with minority business for the early 1980's is estimated to be over \$3 billion per year with no letup anticipated in the next decade. Promising as it is for minority businesses, this increased patronage poses dangers for them, too. First, minority firms risk expanding too fast and overextending themselves financially, since most are small concerns and, unlike large businesses they often need to make substantial investments in new plants, staff, equipment, and the like in order to perform work subcontracted to them. If, thereafter, their subcontracts are for some reason reduced, such firms can face potentially crippling fixed expenses. The world of corporate purchasing can be frustrating for small entrepreneur's who get requests for elaborate formal estimates and bids. Both consume valuable time and resources and a small company's efforts must soon result in orders, or both the morale and the financial health of the business will suffer.

A second risk is that White-owned companies may seek to cash in on the increasing apportionments through formation of joint ventures with minority-owned concerns, of course, in many instances there are legitimate reasons for joint ventures; clearly, white and minority enterprises can team up to acquire business that neither could. Third, a minority enterprise that secures the business of one large corporate customer often runs the danger of becoming – and remaining dependent. Even in the best of circumstances, fierce competition from larger, more established companies makes it difficult for small concerns to broaden their customer bases; when such firms have nearly guaranteed orders from a single corporate benefactor, they may truly have to struggle against complacency arising from their current success.

The author would most likely agree with which of the following statements about corporate response to working with minority subcontractors?

- A. Annoyed by the proliferations of “front” organizations, corporates are likely to reduce their efforts to work with minority owned subcontractors in the near future.
- B. Although corporations showed considerable interest in working with minority businesses in the 1970's their aversion to government paperwork made them reluctant to pursue many government contracts.
- C. The significant response of corporation in the 1970's is likely to be sustained and conceivably be increased throughout the 1980's
- D. Although corporations re eager to co-operate with minority owned businesses, a shortage of capital in the 1970's made substantial response impossible.
- E. The enormous corporate response has all but eliminated the dangers of over expansion that used to plague small minority owned businesses.

Q.10

PASSAGE:In strongly territorial birds such as the indigo bunting, song is the main mechanism for securing, defining, and defending an adequate breeding area. When population density is high, only the strongest males can retain a suitable area. The weakest males do not breed or are forced to nest on poor or marginal territories.

During the breeding season, the male indigo bunting sings in his territory; each song lasts two or three seconds with a very short pause between songs. Melodic and rhythmic characteristics are produced by rapid changes in sound frequency and some regularity of silent periods between sounds. These modulated sounds form recognizable units, called figures, each of which is reproduced again and again with remarkable consistency. Despite the large frequency range of these sounds and the rapid frequency changes that the birds make, the number of figures is very limited. Further, although we found some unique figures in different geographical populations, more than 90 percent of all Indigo bunting figures are extremely stable on the geographic basis. In our studies of isolated buntings we found that male indigo buntings are capable of singing many more types of figures than they usually do. Thus, it would seem that they copy their figures from other buntings they hear singing.

Realizing that the ability to distinguish the songs of one species from those of another could be an important factor in the evolution of the figures, we tested species recognition of a song. When we played a tape recording of a lazuli bunting or a painted bunting, male indigo bunting did not respond; Even when a dummy of male indigo bunting was placed near the tape recorder. Playing an indigo bunting song, however, usually brought an immediate response, making it clear that a male indigo bunting can readily distinguish songs of its own species from those of other species.

The role of the songs figures in interspecies recognition was then examined. We created experimental songs composed of new figures by playing a normal song backwards, which changed the detailed forms of the figures without altering frequency ranges or gross temporal features. Since the male indigos gave almost a full response to the backward song, we concluded that a wide range of figures shapes can evoke positive responses. It seems likely, therefore, that a specific configuration is not essential for interspecies recognition, but it is clear that song figures must conform to a particular frequency range, must be within narrow limits of duration, and must be spaced at particular intervals.

There is evidence that new figures may arise within a population through a slow process of change and selection. This variety is probably a valuable adaptation for survival: if every bird sang only a few types of figures, in dense woods or underbrush a female might have difficulty recognizing her mate's song and a male might not be able to distinguish a neighbor from a stranger. Our studies led us to

conclude that there must be a balance between song stability and conservatism, which lead to clear-cut species recognition, and song variation, which leads to individual recognition.

The primary purpose of passage is to

- A.raise new issues
- B.explain an enigma
- C.refute misconceptions
- D.reconcile differing theories
- E.analyze a phenomenon

Q.11

PASSAGE:In strongly territorial birds such as the indigo bunting, song is the main mechanism for securing g, defining, and defending an adequate breeding are. When population density is high, only the strongest males can retain a suitable area. The weakest males do not breed or are forced to nest on poor or marginal territories.

During the breeding season, the male indigo bunting sings in his territory; each song lasts two or three seconds with a very short pause between songs, Melodic and rhythmic characteristics are produced by rapid changes in sound frequency and some regularity of silent periods between sounds. These modulated sounds form recognizable units, called figures, each of which is reproduced again and again with remarkable consistency. Despite the large frequency range of these sounds and the rapid frequency changes that the birds makes, the number of figures is very limited. Further, although we found some unique figures in different geographical populations, more than 90 percent of all Indigo bunting figures are extremely stable on the geographic basis . In our studies of isolated buntings we found that male indigo buntings are capable of singing many more types of figures than they usually do. Thus, it would seem that they copy their figures from other buntings they hear signing.

Realizing that the ability to distinguish the songs of one species from those of another could be an important factor in the volition of the figures, we tested species recognition of a song. When we played a tape recording of a lazuli bunting or a painted bunting, male indigo bunting did not respond; Even when a dummy of male indigo bunting was placed near the tape recorder. Playing an indigo bunting song, however, usually brought an immediate response, making it clear that a male indigo bunting can readily distinguished songs of its own species from those of other species.

The role of the songs figures in interspecies recognition was then examined. We created experimental songs composed of new figures by playing a normal song backwards, which changed the detailed forms of the figures without altering frequency ranges or gross temporal features. Since the male

indigos gave almost a full response to the backward song, we concluded that a wide range of figures shapes can evoke positive responses. It seems likely, therefore, that a specific configuration is not essential for interspecies recognition, but it is clear that song figures must conform to a particular frequency range, must be within narrow limits of duration, and must be spaced at particular intervals.

There is evident that new figures may arise within a population through a slow process of change and selection. This variety is probably a valuable adaptation for survival: if every bird sang only a few types of figures, in dense woods or underbrush a female might have difficulty recognizing her mate's song and a male might not be able to distinguished a neighbor from a stranger. Our studies led us to conclude that there must be a balance between song stability and conservatism, which lead to clear-cut species recognition, and song variation, which leads to individual recognition.

According to the passage, which of the following is true about the number and general nature of figures sung by the indigo bunting?

- A.They are established at birth
- B.They evolve slowly as the bird learns
- C.They are learned from other indigo buntings.
- D.They develop after the bird has been forced onto marginal breeding areas.
- E.The gradually develop through contact with prospective mates

Q.12

PASSAGE:In strongly territorial birds such as the indigo bunting, song is the main mechanism for securing g, defining, and defending an adequate breeding are. When population density is high, only the strongest males can retain a suitable area. The weakest males do not breed or are forced to nest on poor or marginal territories.

During the breeding season, the male indigo bunting sings in his territory; each song lasts two or three seconds with a very short pause between songs, Melodic and rhythmic characteristics are produced by rapid changes in sound frequency and some regularity of silent periods between sounds. These modulated sounds form recognizable units, called figures, each of which is reproduced again and again with remarkable consistency. Despite the large frequency range of these sounds and the rapid frequency changes that the birds makes, the n umber of figures is very limited. Further, although we found some unique figures in different geographical populations, more than 90 percent of all Indigo bunting figures are extremely stable on the geographic basis . In our studies of isolated buntings we found that male indigo buntings are capable of singing many more types of figures than they usually do. Thus, it would seem that they copy their figures from other buntings they hear signing.

Realizing that the ability to distinguish the songs of one species from those of another could be an important factor in the evolution of the figures, we tested species recognition of a song. When we played a tape recording of a lazuli bunting or a painted bunting, male indigo bunting did not respond; Even when a dummy of male indigo bunting was placed near the tape recorder. Playing an indigo bunting song, however, usually brought an immediate response, making it clear that a male indigo bunting can readily distinguish songs of its own species from those of other species.

The role of the songs figures in interspecies recognition was then examined. We created experimental songs composed of new figures by playing a normal song backwards, which changed the detailed forms of the figures without altering frequency ranges or gross temporal features. Since the male indigos gave almost a full response to the backward song, we concluded that a wide range of figures shapes can evoke positive responses. It seems likely, therefore, that a specific configuration is not essential for interspecies recognition, but it is clear that song figures must conform to a particular frequency range, must be within narrow limits of duration, and must be spaced at particular intervals.

There is evident that new figures may arise within a population through a slow process of change and selection. This variety is probably a valuable adaptation for survival: if every bird sang only a few types of figures, in dense woods or underbrush a female might have difficulty recognizing her mate's song and a male might not be able to distinguish a neighbor from a stranger. Our studies led us to conclude that there must be a balance between song stability and conservatism, which lead to clear-cut species recognition, and song variation, which leads to individual recognition.

It can be inferred that the investigation that determined the similarity among more than 90 percent of all the figures produced by birds living in different regions was undertaken to answer which of the following questions? I.How much variations, if any, is there in the figure types produced by indigo buntings in different locales? II.Do local populations of indigo buntings develop their own dialects of figure types? III.Do figure similarities among indigo buntings decline with increasing geographic separation?

- A.II only
- B.III only
- C.I and II only
- D.II and III only
- E.I, II and III

Q.13

PASSAGE:In strongly territorial birds such as the indigo bunting, song is the main mechanism for securing, defining, and defending an adequate breeding area. When population density is high, only the strongest males can retain a suitable area. The weakest males do not breed or are forced to nest on poor or marginal territories.

During the breeding season, the male indigo bunting sings in his territory; each song lasts two or three seconds with a very short pause between songs, Melodic and rhythmic characteristics are produced by rapid changes in sound frequency and some regularity of silent periods between sounds. These modulated sounds form recognizable units, called figures, each of which is reproduced again and again with remarkable consistency. Despite the large frequency range of these sounds and the rapid frequency changes that the birds makes, the number of figures is very limited. Further, although we found some unique figures in different geographical populations, more than 90 percent of all Indigo bunting figures are extremely stable on the geographic basis . In our studies of isolated buntings we found that male indigo buntings are capable of singing many more types of figures than they usually do. Thus, it would seem that they copy their figures from other buntings they hear signing.

Realizing that the ability to distinguish the songs of one species from those of another could be an important factor in the volition of the figures, we tested species recognition of a song. When we played a tape recording of a lazuli bunting or a painted bunting, male indigo bunting did not respond; Even when a dummy of male indigo bunting was placed near the tape recorder. Playing an indigo bunting song, however, usually brought an immediate response, making it clear that a male indigo bunting can readily distinguished songs of its own species from those of other species.

The role of the songs figures in interspecies recognition was then examined. We created experimental songs composed of new figures by playing a normal song backwards, which changed the detailed forms of the figures without altering frequency ranges or gross temporal features. Since the male indigos gave almost a full response to the backward song, we concluded that a wide range of figures shapes can evoke positive responses. It seems likely, therefore, that a specific configuration is not essential for interspecies recognition, but it is clear that song figures must conform to a particular frequency range, must be within narrow limits of duration, and must be spaced at particular intervals.

There is evident that new figures may arise within a population through a slow process of change and selection. This variety is probably a valuable adaptation for survival: if every bird sang only a few types of figures, in dense woods or underbrush a female might have difficulty recognizing her mate's song and a male might not be able to distinguished a neighbor from a stranger. Our studies led us to conclude that there must be a balance between song stability and conservatism, which lead to clear-cut species recognition, and song variation, which leads to individual recognition.

It can be inferred from the passage that the existence of only a limited number of indigo bunting figures serves primarily to

- A.ensure species survival by increasing competition among the fittest males for the females
- B.increase population density by eliminating ambiguity in the figures to which the females must respond

- C.maintain the integrity of the species by restricting the degree of figure variation and change
- D.enhance species recognition by decreasing the number of figure patterns to which the bird must respond
- E.avoid confusion between species by clearly demarcating the figure patterns of each specials

Q.14

PASSAGE:In strongly territorial birds such as the indigo bunting, song is the main mechanism for securing g, defining, and defending an adequate breeding are. When population density is high, only the strongest males can retain a suitable area. The weakest males do not breed or are forced to nest on poor or marginal territories.

During the breeding season, the male indigo bunting sings in his territory; each song lasts two or three seconds with a very short pause between songs, Melodic and rhythmic characteristics are produced by rapid changes in sound frequency and some regularity of silent periods between sounds. These modulated sounds form recognizable units, called figures, each of which is reproduced again and again with remarkable consistency. Despite the large frequency range of these sounds and the rapid frequency changes that the birds makes, the number of figures is very limited. Further, although we found some unique figures in different geographical populations, more than 90 percent of all Indigo bunting figures are extremely stable on the geographic basis . In our studies of isolated buntings we found that male indigo buntings are capable of singing many more types of figures than they usually do. Thus, it would seem that they copy their figures from other buntings they hear signing.

Realizing that the ability to distinguish the songs of one species from those of another could be an important factor in the volition of the figures, we tested species recognition of a song. When we played a tape recording of a lazuli bunting or a painted bunting, male indigo bunting did not respond; Even when a dummy of male indigo bunting was placed near the tape recorder. Playing an indigo bunting song, however, usually brought an immediate response, making it clear that a male indigo bunting can readily distinguished songs of its own species from those of other species.

The role of the songs figures in interspecies recognition was then examined. We created experimental songs composed of new figures by playing a normal song backwards, which changed the detailed forms of the figures without altering frequency ranges or gross temporal features. Since the male indigos gave almost a full response to the backward song, we concluded that a wide range of figures shapes can evoke positive responses. It seems likely, therefore, that a specific configuration is not essential for interspecies recognition, but it is clear that song figures must conform to a particular frequency range, must be within narrow limits of duration, and must be spaced at particular intervals.

There is evident that new figures may arise within a population through a slow process of change and selection. This variety is probably a valuable adaptation for survival: if every bird sang only a few types of figures, in dense woods or underbrush a female might have difficulty recognizing her mate's song and a male might not be able to distinguished a neighbor from a stranger. Our studies led us to conclude that there must be a balance between song stability and conservatism, which lead to clear-cut species recognition, and song variation, which leads to individual recognition.

It can be inferred that a dummy of a male indigo bunting was placed near the tape recorder that played the songs of different species in order to try to

- A.simulate the conditions in nature.
- B.Rule out visual cues as a factor in species recognition
- C.Supply an additional clue to species recognition for the indigo bunting
- D.Provide data on the habits of bunting species other than then indigo bunting
- E.Confound the indigo buntings in the experiment

Q.15

PASSAGE:In strongly territorial birds such as the indigo bunting, song is the main mechanism for securing g, defining, and defending an adequate breeding are. When population density is high, only the strongest males can retain a suitable area. The weakest males do not breed or are forced to nest on poor or marginal territories.

During the breeding season, the male indigo bunting sings in his territory; each song lasts two or three seconds with a very short pause between songs, Melodic and rhythmic characteristics are produced by rapid changes in sound frequency and some regularity of silent periods between sounds. These modulated sounds form recognizable units, called figures, each of which is reproduced again and again with remarkable consistency. Despite the large frequency range of these sounds and the rapid frequency changes that the birds makes, the n umber of figures is very limited. Further, although we found some unique figures in different geographical populations, more than 90 percent of all Indigo bunting figures are extremely stable on the geographic basis . In our studies of isolated buntings we found that male indigo buntings are capable of singing many more types of figures than they usually do. Thus, it would seem that they copy their figures from other buntings they hear signing.

Realizing that the ability to distinguish the songs of one species from those of another could be an important factor in the volition of the figures, we tested species recognition of a song. When we played a tape recording of a lazuli bunting or a painted bunting, male indigo bunting did not respond; Even when a dummy of male indigo bunting was placed near the tape recorder. Playing an indigo

bunting song, however, usually brought an immediate response, making it clear that a male indigo bunting can readily distinguished songs of its own species from those of other species.

The role of the songs figures in interspecies recognition was then examined. We created experimental songs composed of new figures by playing a normal song backwards, which changed the detailed forms of the figures without altering frequency ranges or gross temporal features. Since the male indigos gave almost a full response to the backward song, we concluded that a wide range of figures shapes can evoke positive responses. It seems likely, therefore, that a specific configuration is not essential for interspecies recognition, but it is clear that song figures must confirm to a particular frequency range, must be within narrow limits of duration, and must be spaced at particular intervals.

There is evident that new figures may arise within a population through a slow process of change and selection. This variety is probably a valuable adaptation for survival: if every bird sang only a few types of figures, in dense woods or underbrush a female might have difficulty recognizing her mate's song and a male might not be able to distinguished a neighbor from a stranger. Our studies led us to conclude that there must be a balance between song stability and conservatism, which lead to clear-cut species recognition, and song variation, which leads to individual recognition.

According to the passage, the authors played a normal indigo bunting song backwards in order to determine which of the following?

- A.What are the limits of the frequency range that will provide recognition by the indigo bunting.
- B.What is the time duration necessary for recognition by the indigo bunting?
- C.How specific must a figure shape be for it to be recognized by the indigo bunting?
- D.How does variation in the pacing of song figures?
- E.Is the indigo bunting responding to cues other than those in the song figures?

Q. 16

Motivating and changing the lives of other people is not that easy. If you are a person who can (1) _____ people towards a certain direction using the word of mouth, then be sure you are a motivator. Nevertheless, there are those who are good motivators and 'bad motivators'. This gives you a question, 'Where are you between the two?' (2) _____ yourself as a motivator rises from within. It is something that you slowly discover that it is within you. Although there are those who are trained, most of the (3) _____ have to come from within you.

Blank(i)	Blank(ii)	Blank(iii)
A. influence	A. imagining	A. words
B. guide	B. identifying	B. ideas
C. steer	C. judging	C. basics

Q. 17

Charisma is something that is hard to explain, but when you see one, you will immediately (1) _____ it. To explain in a layman term, charisma is not about being smart in getting what you want by using some

trickery or (2) _____ means. Simply put, charisma is about (3) _____ that exudes from your own unique personality. Charismatic people are able to inspire enthusiasm, interest, or affection in others by means of personal charm or influence. It is not about acting like a spoiled kid who wants to get his way all the time.

Blank(i)	Blank(ii)	Blank(iii)
A. understand B. recognize C. fathom	A. manipulative B. indirect C. shrewd	A. charm B. influence C. trepidation

Q. 18

In the automotive world, purchasing management is becoming an increasingly (1) _____ job. Purchasing management (2) _____ deals with the (3) _____ buying of all products used by a company, from office supplies to warehouses. As automotive companies expand and set up factories and warehouses on the international scene, purchasing managers have to work with other managers by phone or Internet to co-ordinate purchasing down to the smallest detail.

Blank(i)	Blank(ii)	Blank(iii)
A. challenging B. complex C. demanding	A. typically B. essentially C. primarily	A. rational B. corporate C. wholesale

Q. 19

Environmental health practitioners might have to be (1) _____ workers and change agents in addition to their roles of (2) _____ and preventing environmental health problems. Possessing knowledge alone might not help them provide valuable services in their field. They will have to work with an environmental health team to create (3) _____ about environmental health issues among the community, and show how the locality can be made a better place to live and work.

Blank(i)	Blank(ii)	Blank(iii)
A. social B. community C. public	A. altering B. tackling C. identifying	A. concern B. consciousness C. awareness

Q. 20

Some people find themselves unable to stop multitasking even when it is not necessary. The idea behind this approach is that the multitasking will make it easier to finish all the action items (1) _____ on the agenda and enjoy some well-earned downtime. Unfortunately, people who have become obsessed with multitasking to manage their time never get around to having any downtime. Instead, they finish one set of projects and immediately start looking for another set to do at once. Multitasking as part of time management is fine, provided the tool is used with wisdom and (2) _____. When it becomes an end in and of itself rather than a means to reach a goal, it is time to step back and (3) _____ the situation.

Blank(i)	Blank(ii)	Blank(iii)

A. pending	A. discretion	A. analyze
B. currently	B. insight	B. evaluate
C. listed	C. intelligence	C. re-evaluate

Q. 21

This is called respiratory failure and it is (1) _____. This does not happen frequently but it does happen, the best advice you can get is to get the treatment you need so you do not have to worry about it happening to you. Talk to your doctor before it is too late. Sudden death can occur at any time. The next best piece of advice I can give you about sleep apnea (2) _____ is to lose the excess weight. The more you lose the better off you will be and when you get to your ideal weight or even just meet your weight loss goal you may not have sleep apnea (3) _____.

Blank(i)	Blank(ii)	Blank(iii)
A. dangerous	A. problem	A. anymore
B. risky	B. obesity	B. recurrence
C. fatal	C. symptoms	C. woes

Q. 22

In truth, listening, communicating, and (1) _____ are skills that go hand in hand. You must be able to see things from other people's perspectives and deliver a message in such a way that is (2) _____ or agreeable to them. If you cannot empathize with others, if you cannot put yourself in their shoes, you will not be able to really (3) _____ what it is they want.

Blank(i)	Blank(ii)	Blank(iii)
A. understanding	A. acceptable	A. comprehend
B. sympathy	B. comprehensible	B. fathom
C. empathy	C. likeable	C. interpret

Q. 23

Hearing dispensers test the (1) _____ and type of hearing loss, and help patients select the right hearing aid for them. The dispensers have to interpret the results provided by hearing assessment equipment, and to be familiar with hearing aid electronics and specifications. They will also have to carry out required (2) _____ and programming to fit the aid to the hearing loss. Hearing aid dispensers have to get trained under a licensed hearing aid dispenser, and can then sit for (3) _____ assessment examinations.

Blank(i)	Blank(ii)	Blank(iii)
A. degree	A. tests	A. competency
B. category	B. manipulations	B. voluntary
C. extent	C. modifications	C. optional degree, modifications, competency

Q. 24

Some of the negatives associated with wind energy and wind turbines lie in the (1) _____ of wind. For example, no wind means the turbine does not rotate and electricity is not generated. Sites are another problem; rows and rows of wind turbines are just not (2) _____ in a city of a few million people. The most important issue however lies in cost effectiveness, most power companies are still reluctant to invest in or buy

their power from companies that use wind turbines. This is changing as governments around the world have started (3) _____ power generation through alternative sources like wind.

Blank(i)	Blank(ii)	Blank(iii)
A. irregularity B. unpredictability C. unavailability	A. available B. feasible C. possible	A. subsidizing B. promoting C. endorsing

Q. 25

For you to be a public speaker who is motivating, you have to convey expertise and (1) _____ in the subject you are dealing with. If you are tackling a business niche, ensure that you have at least some (2) _____ of what kind of business you are talking about. Avoid being (3) _____. People don't want to hear what they already know; they want something new, something that is touching their need. This means that you have to explore the environment and identify the area which is affected most as far as business is concerned, the same to other areas of life.

Blank(i)	Blank(ii)	Blank(iii)
A. information B. passion C. assurance	A. details B. background C. basics	A. repetitive B. general C. boring

Q. 26

Phobias can, on rare occasions, have very serious (1) _____ not just for our mental health but for our physical health too. A fear of the dentist might be a common subject in comedy, but losing your teeth because you were too afraid to get your toothache checked out (2) _____ isn't funny. Being unable to undergo important medical tests or procedures because of your fear of needles could even be life threatening, unless you face that fear head on and decide to tackle it. Whether you do this is under your own steam, but with the support of friends and/or professional help (3) _____ fear from your life will make you a happier person.

Blank(i)	Blank(ii)	Blank(iii)
A. repercussions B. implications C. ramifications	A. obviously B. definitely C. apparently	A. eradicating B. diminishing C. removing

Q. 27

Obstructed nasal airways can cause snoring. Obstructed airways happen from allergies or a sinus infection. (1) _____ deformities such as nasal polyps or a deviated septum can cause obstruction. A deviated septum is a (2) _____ change in the thin wall in your nose separating one of your nostrils from the others. Relieving obstructed nasal airways often helps (3) _____ snoring. After all, you can't breathe when you're all jammed up!

Blank(i)	Blank(ii)	Blank(iii)

A. nasal	A. physical	A. minimize
B. hereditary	B. prominent	B. relieve
C. physical	C. structural	C. remove

Q. 28

Alternative Energy Solutions include all prime movers that can use a renewable (1) _____ resource to produce energy. This may be wind, thermal energy from the earth, and wave action in the shores and solar energy from the sun. Alternative energy resources can also include new technology like fuel cells. However the primary fuel humanity has long depended on has been oil. We now know from our own (2) _____ that the oil reserves in the world are slated to be (3) _____ by 2050. Simply put, the world is running out of gas!

Blank(i)	Blank(ii)	Blank(iii)
A. cheap	A. calculations	A. unavailable
B. alternative	B. estimations	B. saturated
C. natural	C. projections	C. unviable

Q. 29

Depression is much more than mere (1) _____. It is defined as emotional dejection and withdrawal. We often say that we are depressed because something unfortunate happened during our day or we couldn't get our way. However, real depression is a (2) _____ diagnosed condition that often needs therapy plus some medication to relieve. There is a way to find out if you have a (3) _____ toward this condition. It is called a depression quiz. This test helps you determine whether you are showing signs of being depressed by the symptoms you express.

Blank(i)	Blank(ii)	Blank(iii)
A. anxiety	A. clinically	A. penchant
B. sadness	B. medically	B. tendency
C. gloom	C. scientifically	C. proclivity

Q. 30

In today's world, it is not unusual for people to handle more than one task at a time. This is perfectly all right, as long as the tasks in question can be conducted (1) _____ without causing a great deal of (2) _____. For example, it is possible to participate on a conference call while also sending instant messages to the moderator of the conference. The two activities actually work together without any real difficulty. However, many people attempt to conduct two or more labor-intensive tasks at the same time. This can lead to a great deal of inner conflict and possibly have a negative impact on the quality applied to all the tasks involved. In other words, instead of ending up with one task done well, you have two tasks that you may complete but are barely (3) _____.

Blank(i)	Blank(ii)	Blank(iii)
A. concurrently	A. upheaval	A. appreciated
B. together	B. confusion	B. manageable
C. smoothly	C. stress	C. acceptable
