Andhra Pradesh State Council of Higher Education

Question Paper Name: Pharmacy PY 30th Sep 2020 Shift 2

Subject Name: Pharmacy (PY)

Creation Date: 2020-09-30 17:27:27

Duration:120Total Marks:120Display Marks:NoShare Answer Key With Delivery Engine:YesActual Answer Key:Yes

Pharmacy (PY)

Group Number:

Group Id: 29996542

Group Maximum Duration: 120 **Group Minimum Duration: Show Attended Group?:** No **Edit Attended Group?:** No **Break time:** 0 **Group Marks:** 120 Is this Group for Examiner?: No **Revisit allowed for group Instructions?:** Yes **Maximum Instruction Time:** 0 **Minimum Instruction Time:** 0

Pharmacy (PY)

Section Id: 29996542

Section Number:

Mandatory or Optional: Mandatory

Number of Questions :120Section Marks :120Display Number Panel :YesGroup All Questions :YesMark As Answered Required? :YesSub-Section Number :1

Sub-Section Id: 29996542

Question Shuffling Allowed: Yes

Question Number: 1 Question Id: 2999654921 Question Type: MCQ Display Question Number: Yes Is

Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

The roots of the following drugs effective, except
Options:
Rauwoflia
2. Turmeric
3. Ipecacuanha
TA CALLEGATE & PARK
Aconite 4.
Question Number: 2 Question Id: 2999654922 Question Type: MCQ Display Question Number: Yes Is
Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Andrographolide is active constituents of
Options:
Gentian 1.
Picrorhiza 2.
2.
Chirata 3.
4. Kalmeh
Question Number: 3 Question Id: 2999654923 Question Type: MCQ Display Question Number: Yes Is
Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Glycosides are condensation products of
Options:
sugar + aglycone
1.
sugar + protein
fats + aglycone
sugar + fats
collegedunia India's largest Student Review Platform

Question Number: 4 Question Id: 2999654924 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
The gum which is obtained from the endosperm of the seeds of Cyamopsis
tetragonolobus belongs to the family? Options:
Plantaginaceae
2. Leguminosae
3. Asteraceae
Combretaceae 4.
Question Number: 5 Question Id: 2999654925 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Plant tissue culture technique is a redefined method of
Options:
DNA recombination
2. hybridization
3. vegetative propagation
4. selection
Question Number: 6 Question Id: 2999654926 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Which of the following drug shows needle shaped crystals when treated with strong
potassium hydroxide solution?
Options:
1. Clove
2. Fennel collegedunia India's largest Student Review Platform

3. Cinnamon
4. Dill
Question Number: 7 Question Id: 2999654927 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
The identification test for the detection of aloes is
Options:
1. Shinoda test
2. Keller killani test
3. Borax test
Legal's test 4.
Question Number: 8 Question Id: 2999654928 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
An example for pentacyclic triterpenoid saponin is
Options:
1. Liquorice
2. Dioscorea
3. Rhubarb
Strophanthus 4.
Question Number: 9 Question Id: 2999654929 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Muramidase is an enzyme belonging to

Proteolytic enzyme 2. Amylolytic enzyme , Hydrolytic enzyme Mucolytic enzyme Question Number: 10 Question Id: 2999654930 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Source of Veegum is **Options:** Natural, plant Natural, Animal Semisynthetic, mineral Natural, mineral Question Number: 11 Question Id: 2999654931 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical The active constituent of castor oil is **Options:** Lauric acid 2. Myristic acid Ricinoleic acid Stearic acid

Morphine content in Opium is
Options:
Less than 0.5%
2. 10-15%
3. 1-5%
5-10% 4.
Question Number: 13 Question Id: 2999654933 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Dried latex of all of the drugs are used except
Options:
Opium 1.
Gatta parcha 2.
Papain 3.
Balsam 4.
Question Number: 14 Question Id: 2999654934 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Which of the following herb used in treatment of dropsy?
Options:
1. Rhubarb
2. Digitalis
Ashwagandha

4. Clove

Question Number: 15 Question Id: 2999654935 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

A powder that can be identified by numerous paracytic stomata is:

Options:

- Datura
- Senna
- Vasaka
- 4. Belladona

Question Number: 16 Question Id: 2999654936 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Which of the following is prodrug of ampicillin?

Options:

- Amoxicillin
- 2 Pivampicillin
- 3. Azlocillin
- Nafcillin 4.

Question Number: 17 Question Id: 2999654937 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Which of the following is an enantiomeric mixture of d-hyoscyamine and l-hyoscyamine?

Options:

ipratropium

2. Atropine

3. Hyoscine

Tropine

Question Number: 18 Question Id: 2999654938 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Which of the following COX inhibitor is classified as arylpropionic acid derivative?

Options:

Diclofenac

Ibuprofen

Sulindac

Piroxicam

Question Number: 19 Question Id: 2999654939 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

IUPAC name of chloroquine is

Options:

N'-(7-chloroquinolin-4-yl)-N,N-diethyl-pentane-1,4-diamine

N'-(2-chloroquinolin-4-yl)-N,N-diethyl-pentane-1,4-diamine

N'-(7-chloroquinolin-4-yl)-N,N-diethyl-butane-1,4-diamine

Question Number: 20 Question Id: 2999654940 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Phenoxy methyl penicillin is more suitable for oral absorption than benzyl penicillin because **Options:** benzyl penicillin undergo degradation in stomach acidic conditions benzyl penicillin undergo rapid fist pass metabolism benzyl penicillin is incompatible with milk 4 benzyl penicillin is irritant to gut wall Question Number: 21 Question Id: 2999654941 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Which of the following is **NOT** a β -lactamase inhibitor? **Options:** Sulbactam Aztreonam Tazobactam Clavulanic acid

Question Number: 22 Question Id: 2999654942 Question Type: MCQ Display Question Number: Yes Is

Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

N'-(2-chloroquinolin-4-yl)-N,N-diethyl-pentane-1,6-diamine

Which drug is synthesized by using the below synthetic scheme?

Options:

- Atenolol
- 2. Propronolol
- Sotolol 3.
- Naptholol

Question Number: 23 Question Id: 2999654943 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Which of the following is a selective COX-2 inhibitor?

Options:

- Diclofenac
- 2 Ibuprofen
- Meloxicam
- 4 Indomethacin

Question Number: 24 Question Id: 2999654944 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Which of the following is classified as biguanide hypoglycemic agent?

- Glyburide
- Metformin

Miglitol 3.
Rosiglitazone 4.
Question Number: 25 Question Id: 2999654945 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Example for tricyclic H1 Receptor antagonist is
Options:
Azatadine 1.
2. Clamustine
3. Cyclizine
4. Doxylamine
Question Number: 26 Question Id: 2999654946 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
7,8-dihydro -6-keto derivative of morphine is
Options:
1. Hydromorphine
2. Etorphine
3. Normorphine
Codeine 4.
Question Number: 27 Question Id: 2999654947 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
A prodrug that releases COLTEROL on activation by lung esterase is
Options:
Fenoterol .
collegedunia India's Largest Student Review Platform

2. Formoterol
3. Albuterol
4. Bitolterol
Question Number: 28 Question Id: 2999654948 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Which of the following undergoes benzylic oxidation converted into inactive benzoic
acid derivative?
Options:
1. Tolbutamide
2. Glypizide
3. Glimenclamide
Nateglinide 4.
Question Number: 29 Question Id: 2999654949 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Nitroacetic acid is more acidic compared to acetic acid because of
Options:
Resonance effect
Inductive effect 2.
3. Steric effect
Hydrogen bonding 4.

Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical The aromatic nucleus present in naproxen is
Options:
1. Benzene
2. Naphthalene
3. Anthracene
Pyridine 4.
Question Number: 31 Question Id: 2999654951 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Amitryptyline is synthesized from the following starting material
Options: Phthalic anhydride 1.
2. Terephthalic acid
3. Phthalamic acid
4. Phthalimide
Question Number: 32 Question Id: 2999654952 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Cardiac glycosides have the following configuration in the aglycone part of the steroid
nucleus
Options:
1. 5α, 14 α
5 α, 14 β
3. 5 β, 14α

Question Number: 33 Question Id: 2999654953 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Nicotine is derivative of
Options:
Quinoline 1.
2. Pyrimidine
3. Pyridine
4. Isoquinoline
Question Number: 34 Question Id: 2999654954 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Captopril is an N-acylated derivative of
Options:
Phenylalanine 1.
2. Histidine
3. Leucine
4. Proline
Question Number: 35 Question Id: 2999654955 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical α1 Globulin is known as
Options:
1. Orosomucoid
2. Transcortin

3. Ceruloplasmin
4. Transferrin
Question Number: 36 Question Id: 2999654956 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Hydroxylation of Diazepam on C3 results in
Options:
increased lipid solubility
increased potency
3. increased duration of action
increased bioavailability 4.
Question Number: 37 Question Id: 2999654957 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Isatin is the starting material for the synthesis of
Options:
1. Dibucaine
2. Mepivacaine
3. Prilocaine
Bupivacaine 4.
Question Number: 38 Question Id: 2999654958 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
In cephalosporins lactam ring is fused with
Options:

collegedunia [8]
India's largest Student Review Platform

- Thiazolidine system
- 2. 1,3 dihydrothiazine system
- Thiazine
- Dehydro thiazolidine system

Question Number: 39 Question Id: 2999654959 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

- 4 Methyl pyridine is oxidized and then it is heated with anhydrous hydrazine to give **Options**:
- INH
- 2. Pyrazinamide
- Ethionamide
- PAS

Question Number: 40 Question Id: 2999654960 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

The starting materials for the synthesis of epinephrine are

Options:

- Catechol and Chloro propyl chloride
- 2 Catechol and Chloro acetyl chloride
- Catechol and Chloro ethyl chloride
- 4 Catechol and Chloro Methyl chloride

Question Number: 41 Question Id: 2999654961 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Ostwald's ripening defect is related to
Options:
Coagulate formulation
2. Sedimentation rate
3. Crystal bridging
4. Interfacial tension
Question Number: 42 Question Id: 2999654962 Question Type: MCQ Display Question Number: Yes Is
Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
If a drug shows small volume of distribution V _d , it is likely that this drug
Options:
has a short biological half life
does not accumulate in various tissues and organs 2.
3. not bioavailable
will not be effective
Question Number: 43 Question Id: 2999654963 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Coulter counter is used to determine
Options:
Particle size
Particle surface area
3. Particle volume
Particle shape

collegedunia [8]
India's largest Student Review Platform

Question Number: 44 Question Id: 2999654964 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Cascade impactor is used to evaluate **Options:** Oral drug delivery system Parenteral drug delivery system Pulmonary drug delivery system Transdermal drug delivery system Question Number: 45 Question Id: 2999654965 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Water attack test is used for following type of glass **Options:** Type I 1. Type II 2. Type III Type IV Question Number: 46 Question Id: 2999654966 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Negative value of Log P indicates

- The compound is highly soluble in water
- The compound is highly soluble in octanol
- The compound has equal solubility in water and octanol

The compound is neither soluble in water nor in octanol

Question Number: 47 Question Id: 2999654967 Question Type: MCQ Display Question Number: Yes Is Ouestion Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Agglomeration in aerosols can be reduced by including

Options:

- Anionic surfactant with HLB greater than 10
- 2 Cationic surfactant with HLB less than 10
- Non-ionic surfactant with HLB greater than 10
- Non -ionic surfactant with HLB less than 10

Question Number: 48 Question Id: 2999654968 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

10 mg of drug substance in 1000 ml of solvent gives a concentration of

Options:

- 0.01 ppm
- 2. 0.1 ppm
- 3 100 ppm
- 4. 10 ppm

Question Number: 49 Question Id: 2999654969 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Which of the capsule size has the smallest capacity?

- 4
- 2. 5

3. 0 000 Question Number: 50 Question Id: 2999654970 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Wurster process used in microencapsulation is **Options:** Coacervation-phase separation 2. Air suspension method 3. Pan coating Solvent evaporation method Question Number: 51 Question Id: 2999654971 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Plug flow problem arises in which of the following viscometers? **Options:** Ostwald Cone and plate Cup and bob Falling sphere Question Number: 52 Question Id: 2999654972 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Dimethicone is used in Shampoos as **Options:** Foam booster

2. Conditioner
3. Cleansing agent
4. Stabilizer
Question Number: 53 Question Id: 2999654973 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Which of the following polymer due to its positive charge employed in ophthalmic
formulation to improve the adherence time of formulation?
Options:
1. Span
Chitosan 2.
3. Tween
Cholesterol 4.
Question Number: 54 Question Id: 2999654974 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Mottling means
Options:
Inadequate spreading of coating solution
2. Partial/complete separation of bottom portion of tablet
Unequal distribution of colour on a tablet
Formation of dull film, due to excessive humidity

Question Number: 55 Question 1d: 2999654975 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Bubble point test is done to determine
Options:
the surface tension of the liquid in capillary tubes
the viscosity of the liquid in ampoules
3. the pH of a 1% solution
the volume of the solution stored in a specified container 4.
Question Number: 56 Question Id: 2999654976 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Which of the following inorganic compound is known as Epsom salt?
Options:
1. Zinc sulfate
2. Sodium potassium tartrate
Megnesium sulphate 3.
4. Calcium hydroxide
Question Number: 57 Question Id: 2999654977 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
The coating defect associated with inadequate spreading of coating solution in coated
tablets is
Options:
1. Cracking
2. Blooming

- Orange peeling
- Blistering

Question Number: 58 Question Id: 2999654978 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Geriatric population should be included in the following phase of clinical trials:

Options:

- Phase I
- Phase II
- Phase III
- 4. Phase IV

Question Number: 59 Question Id: 2999654979 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical A drug (200 mg dose) administered in tablet form and as intravenous injection (50 mg dose) showed AUC of 100 and 200 microgram hr/mL, respectively. The absolute availability of the drug through oral administration is:

Options:

- 125%
- 250 %
- 12.5%
- 1.25%

Question Number: 60 Question Id: 2999654980 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Measurement of inulin renal clearance is a measure for
Options:
Effective renal blood flow
2. Renal drug excretion rate
3. Active renal secretion
4. Glomerular filtration rate
Question Number: 61 Question Id: 2999654981 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
For an ideal suspension sedimentation volume should be
Options:
Less than one
2. Zero
3. More than one
4. Equal to one
Question Number: 62 Question Id: 2999654982 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Which of the following organism contains periplasmic flagella?
Options:
1. Escheria coli
Salmonella typhi 2.
3. Treponema pallidum
4. Psudomonas aeruginosa

collegedunia

Question Number: 63 Question Id: 2999654983 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
The purity of the BCG vaccine can be identified by using the following primary dye in
staining process.
Options:
crystal violet
2. methylene blue
3. carbolfuchsin
malachite green 4.
Question Number: 64 Question Id: 2999654984 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Which of the following method doesn't kill endospores?
Options:
1. Moist heat sterilization
2. Dry heat sterilization
3. Fractional sterilization
4. Incineration
Question Number: 65 Question Id: 2999654985 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
In agglutination reactions, the antigen is a; in precipitation reactions, the
antigen is a
Options:
1. whole cell / soluble molecule
2. soluble molecule/ whole cell

protein / carbohydrate 3.

carbohydrate / protein

4

Question Number: 66 Question Id: 2999654986 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

The normal distribution of ABO groups in pooled plasma is

Options:

- equal numbers of A & O together with at least one B or AB donations
- equal numbers of A & B together with at least one O or AB donations
- equal numbers of B & O together with at least one A or AB donations
- equal numbers of A & B together with at least one O donations

Question Number: 67 Question Id: 2999654987 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Which of the following is the source of fibrinogen except

Options:

- Dried human plasma
- Dried human serum
- 3. Fresh frozen plasma
 - Fractionated plasma

Question Number: 68 Question Id: 2999654988 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

In RNA adenine normally pairs with:

Options: Cytosine Guanine 3. Uracil Thymine Question Number: 69 Question Id: 2999654989 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical All the statements regarding first order reaction are true except **Options:** Rate is dependent on concentration 1. Half life is changing parameter T90% is independent of concentration 4 Logarithm of concentration vs time yields a straight line Question Number: 70 Question Id: 2999654990 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Number of tablets/weight of tablets required for carrying out friability test as per Indian Pharmacopoeia 2018 is **Options:** 5 tablets of any weight 2 10 tablets of any weight

6.5 grams of tablets if the tablet weight is less than 650 mg

collegedunia

20 tablets of any weight Question Number: 71 Question Id: 2999654991 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Schedule F3 is related to the **Options:** Standards for production of sera Standards for ophthalmic preparation Standards for surgical dressing Standards for sterilized umbilical tapes Ouestion Number: 72 Question Id: 2999654992 Question Type: MCO Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Standard for disinfectant fluid comes under Schedule . **Options:** 1. 2. R 3. S 4 E Question Number: 73 Question Id: 2999654993 Question Type: MCQ Display Question Number: Yes Is **Ouestion Mandatory: No Single Line Ouestion Option: No Option Orientation: Vertical** Indian Pharmacopoeial Laboratory is located at ... **Options:** Allahabad 2. Ghaziabad

3. Kasauli New Delhi Question Number: 74 Question Id: 2999654994 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical A drug is considered to be spurious. **Options:** if it consists in whole or in part of any filthy, putrid or decomposed substance if it contains the color other than one which is prescribed if it is not labelled in the prescribed manner if it has been substituted wholly or in part by another drug substance 4. Question Number: 75 Question Id: 2999654995 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical Standards for mechanical contraceptives are given under Schedule **Options:** S $_2$ R 3 Τ Question Number: 76 Question Id: 2999654996 Question Type: MCQ Display Question Number: Yes Is

Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Which vitamin is useful in the alcoholism?

Pyridoxine 1.
Phenobarbitone 2.
3. Thiamine
4. Folic acid
Question Number: 77 Question Id: 2999654997 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Both alpha and beta blocker is
Options:
Propranolol 1.
2. Prazosin
3. Labetalol
4. Esmolol
Question Number: 78 Question Id: 2999654998 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Which of these drugs is not used for treatment of systemic fungal infection?
Options:
Fluconazole 1.
2. Ketoconazole
3. Meconazole
Econazole 4.

Question Number: 79 Question Id: 2999654999 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Mechanisms of transmembrane signaling are the following EXCEPT ______.

Options:

- Transmembrane receptors that bind and stimulate a protein tyrosine kinase
- Gene replacement by the introduction of a therapeutic gene to correct a genetic effect
- Ligand-gated ion channels that can be induced to open or close by binding a ligand

Transmembrane receptor protein that stimulates a GTP-binding signal transducer protein (G-protein) which in turn generates an intracellular second messenger

Question Number: 80 Question Id: 2999655000 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Which of the following statement about beta blockers in hypertension is correct.

Options:

- Propranolol is preferred to Atendlol in elderly patients
- Beta blockers should never be combined with nifedipine 2.
- Beta blockers never combined with hydrochlorthiazide
- Beta blockers should not be withdrawn abruptly

Question Number: 81 Question Id: 2999655001 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

What is insurmountable antagonism?

Options:

1.

In presence of antagonist agonist will produce maximal response at higher concentrations

- In presence of antagonist agonist will never produce maximal response in spite of increasing agonist concentrations
- In presence of antagonist the dose response curve for agonist shifts towards left side
- In presence of antagonist agonist produces synergistic effects

Question Number: 82 Question Id: 2999655002 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Selective $\beta 2$ - Receptor agonist is used in the treatment of

Options:

- Asthma
- Heart failure
- Hypertension
- Hypotension

Question Number: 83 Question Id: 2999655003 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Tacrine produces beneficial effects in Alzheimers disease through

Options:

- Inhibiting AChE
- 2. Activating AChE
- 3 Inhibiting MAO
- 4. Activating MAO

Question Number: 84 Question Id: 2999655004 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Fexofenadine is an active metabolite of one of the following
Options:
1. Loratadine
2. Rupatidine
3. Tiprolidine
4. Terfenadine
Question Number: 85 Question Id: 2999655005 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Torsades de Pointes are generally associated with
Options:
Long QT interval
2. Long PR interval
3. Short QT interval
Short PR interval 4.
Question Number: 86 Question Id: 2999655006 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Ondansetron is a
Options:
1. 5-HT3 Antagonist
2. 5-HT3 Agonist
3. H1-Antagonist
4. H1-Agonist

Question Number: 87 Question Id: 2999655007 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Therapeutic Drug Monitoring is required for following drug?
Options:
Isoniazid 1.
2. Rifampicin
Digoxin 3.
Sulphonamide 4.
Question Number: 88 Question Id: 2999655008 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Propylthiouracil is used for the treatment of
Options:
1. Hypothyroidism
Hyperthyroidism 2.
Gynecomastia 3.
4. Viral infections
Question Number: 89 Question Id: 2999655009 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Metabolic transformation (phase 1) is
Options: 1. Acetylation and methylation of substances
Transformation of substances due to oxidation, reduction or hydrolysis

3. Glucuronide formation
4. Binding to plasma proteins
Question Number: 90 Question Id: 2999655010 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Urinary tract antiseptic is
Options:
Nalidixic acid
2. Benzylpenicillin
3. Sulfadoxine
4. Cloxacillin
Question Number: 91 Question Id: 2999655011 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Which of the following is the oral anticoagulant?
Options:
Heparin 1.
2. Warfarin
3. Vitamin K
Danaparoid 4.
Question Number: 92 Question Id: 2999655012 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Which of the following general anesthetics is given by inhalation route?

Question Mandatory: No Single Line Question Option: No Option Orientation: vertical
Peripherally direct acting muscle relaxant is
Options:
Pancuronium 1.
Decamethonium 2.
Quinine 3.
4. Succinylcholine
Question Number: 96 Question Id: 2999655016 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Which one of the following detectors is not used in gas chromatography?
Options:
Flame ionization
Electron capture
3. Thermal conductivity
4. Bolometer
Question Number: 97 Question Id: 2999655017 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Conductivity measurement is based on the principle of
Options:
Wheatstone bridge
2. Potentiometer
3. Meter bridge
4. Polarimeter

collegedunia §

Which of the following reagents is commonly used as mulling reagent in	IR
spectroscopy?	
Options:	
1. CHCl ₃	
2. Nujol	
3. Hydrocarbon	
4. Chlorofluoro carbon oil	
Question Number: 99 Question Id: 2999655019 Question Type: MCQ Display Question Number: Yes I Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical	Is
Which one of the following electrodes is used in conductivity cell?	
Options: Dropping Mercury electrode 1.	
2. Platinum electrode	
3. Calomel electrode	
Glass electrode	
Question Number: 100 Question Id: 2999655020 Question Type: MCQ Display Question Number: Yes Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical	Is
All of the given have same principle except	
Options:	
1. HPTLC	
GLC	

collegedunia

3. HPLC
Paper chromatography 4.
Question Number: 101 Question Id: 2999655021 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
In Potentiometer the current passing at the balance point is
Options:
High 1.
2. Low
3. Medium
4. Zero
Question Number: 102 Question Id: 2999655022 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical In HPLC, the analytical performance of the column improves when Options: 1. Particle diameter is reduced
Particle diameter is increased 2.
Coarser particle are paired with shorter columns 3.
4. Low temperature is used
Question Number: 103 Question Id: 2999655023 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
The IR radiation source-globar, is chemically made of
Options:
Silicon carbide 1. Silicon carbide

2. Silicon disulphide
3. Zirconium oxide
4. Selenium disulphide
Question Number: 104 Question Id: 2999655024 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Substances having nearly the same Rf values can be distinguished by
Options:
1. Ascending – descending method
2. 2D paper chromatography
3. Circular paper chromatography
Radial technique
Question Number: 105 Question Id: 2999655025 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
The factors affecting diffusion current in polarography can be denoted by
Options:
1. Nernst equation
2. Ilkovic equation
Lamberts law 3.
Mark-Houwink equation
4. Collegedunia India's Largest Student Review Platform

Question Number: 106 Question Id: 2999655026 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

Which of the following requires the most energy in IR?
Options:
Wagging 1.
2. Twisting
3. Asymmetric bending
Asymmetric stretching 4.
Question Number: 107 Question Id: 2999655027 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Q7 guidelines of ICH meant for
Options:
Good laboratory practice
2. Pharmaceutical development
3. Good manufacturing practice
4. Life cycle management
Question Number: 108 Question Id: 2999655028 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
pM indicators are used in
Options:
Acid base titrations 1.
Non-aqueous titrations
3. Gravimetry
4. Complexometric titrations

Question Number: 109 Question Id: 2999655029 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Which of the following chromophore shows strong absorption in FTIR?
Options:
1. C-H
2. C-C
3. C=C
4. C=O
Question Number: 110 Question Id: 2999655030 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
The indicator electrode used in precipitation titrations is
Options:
1. Platinum
2. Silver
3. Gold
Calomel 4.
Question Number: 111 Question Id: 2999655031 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Standard and test samples can be simultaneously analysed in
Options:
1. HPLC
2. HPTLC
UHPLC 3.

collegedunia [8]

4. GC

Question Number: 112 Question Id: 2999655032 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
The following affects the quantitative analysis in HPLC
Options:
Tailing factor
2. Retention time
3. Capacity factor
4. Theoretical plates
Question Number: 113 Question Id: 2999655033 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Calibration of control of absorbance of UV-Visible spectrometer is performed by using
Options:
Potassium chloride
2. Potassium dichromate
3. Holmium perchlorate
4. Potassium permanganate
Question Number: 114 Question Id: 2999655034 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
IR wave number for amine functional group is
Options:
2850 – 2970 cm ⁻¹

2. 2100 - 2300 cm ⁻¹
3. 3300 - 3500 cm ⁻¹
3000 - 3100 cm ⁻¹
Question Number: 115 Question Id: 2999655035 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
Radiation source used in spectrofluorimeter is
Options:
Tungsten Lamp
Deuterium Lamp 2.
3. Xenon lamp
4. Sodium vapour lamp
Question Number: 116 Question Id: 2999655036 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
column is used in both reverse phase and normal phase chromatography.
Options:
1. Silica
2. Phenyl
3. Cyanide
4. End capped C-18
Question Number: 117 Question Id: 2999655037 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical
The order of eluent strength of reversed phase solvents is
Options : collegedunia India's Largest Student Review Platform

Acetonitrile < methanol < water	
2. Acetonitrile > methanol > water	
3. Methanol > acetonitrile > water	
4. Methanol < acetonitrile < water	
Question Number: 118 Question Id: 2999655038 Quest Question Mandatory: No Single Line Question Option:	
Halogenation in aromatic compounds	the fluorescence.
Options:	
1. Increases	
2. Inhibits	
3. Reduces	
4. Imparts	
Question Number: 119 Question Id: 2999655039 Quest Question Mandatory: No Single Line Question Option:	
The strong peak for carbonyl compounds is	obtained in IR spectroscopy at cm ⁻¹ .
Options:	
1. 3200	
2. 2200	
3. 1650	
4. 950	collegedu

Question Number: 120 Question Id: 2999655040 Question Type: MCQ Display Question Number: Yes Is Question Mandatory: No Single Line Question Option: No Option Orientation: Vertical

The unit of magnetic field in NMR is_____.

Options:

1. Cycles/sec

Pulse/sec

Gauss

4. Tesla
