The secret, Chiang says, is to "begin by knowing that you have already arrived."

Not satisfied with his new life, Jonathan returns to Earth to find others like him, to bring them his learning and to spread his love for flight.

Ultimately, the very first of his students, Fletcher Lynd Seagull, becomes a teacher in his own right, and Jonathan leaves to teach other flocks.

They aim to refine the self-improvement field by way of an intentional increase in scientifically sound research and well-engineered models. The division of focus and methodologies has produced several subfields, in particular: general positive psychology; and personal effectiveness. This includes the intentional training of new patterns of thought and feeling.

18. The film "The Red Balloon", tells of Pascal, who, on his way to school one morning, discovers a large red balloon.

As Pascal plays with his new-found toy, he realizes it has a mind of its own. It begins to follow him wherever he goes.

The balloon follows Pascal through the streets of Paris, and they draw inquisitive looks from adults and the envy of other children as they wander the streets.

At one point it enters his classroom, causing an uproar from his classmates which alerts the principal, who becomes angry with him and locks him up in his office until school is over.
