

# PTE Listening Practice Test 14

Audio Clip:

[You will hear a radio interview about sustainable living. Listen carefully and answer the following question.]

Transcript:

Interviewer: Good morning, listeners. Today, we have Dr. Emily Turner with us, an expert in sustainable living and environmental conservation. Welcome, Dr. Turner.

Dr. Turner: Thank you for having me. It's a pleasure to be here.

Interviewer: Dr. Turner, can you share some practical tips for our audience on how to lead a more sustainable lifestyle in their daily lives?

Dr. Turner: Absolutely. One of the simplest steps is to reduce single-use plastics. Carry a reusable water bottle, use cloth bags instead of plastic ones, and try to avoid unnecessary packaging. Small changes collectively make a big difference.

Interviewer: Great advice. What about energy conservation? Any tips on how individuals can reduce their energy footprint?

Dr. Turner: Definitely. Energy-efficient appliances and using LED bulbs can significantly lower energy consumption. Also, remember to turn off lights and unplug devices when not in use. Conserving energy not only benefits the environment but also reduces utility bills.

Interviewer: That's very practical. Now, in terms of transportation, how can people contribute to reducing their carbon footprint?

Dr. Turner: Opt for public transportation, carpool, or consider cycling or walking for short distances. If possible, switch to electric or hybrid vehicles. Transportation is a major contributor to carbon emissions, so choosing eco-friendly options is crucial.

Interviewer: Important points. Lastly, can you discuss the role of sustainable diets in environmental conservation?

Dr. Turner: Absolutely. Adopting a plant-based diet or reducing meat consumption can have a positive impact. Livestock farming is resource-intensive, and by making mindful choices in our diets, we can promote both personal health and environmental sustainability.

Interviewer: Thank you, Dr. Turner, for these valuable insights into sustainable living.

Dr. Turner: My pleasure. It's everyone's responsibility to contribute to a healthier planet.

**Multiple Choice, Choose Multiple Answers:**

According to Dr. Turner's advice on sustainable living, which of the following are practical tips for reducing an individual's carbon footprint? (Select all that apply)

- A) Using energy-efficient appliances
- B) Carrying a reusable water bottle
- C) Opting for public transportation
- D) Adopting a meat-heavy diet

**Multiple Choice, Choose Multiple Answers:**

In the context of the interview, what did Dr. Turner emphasize as ways to contribute to environmental conservation? (Select all that apply)

- A) Reducing single-use plastics
- B) Conserving energy through LED bulbs
- C) Increasing meat consumption
- D) Unplugging devices when not in use

**Select Missing Word:**

Dr. Turner: One of the simplest steps is to reduce single-use plastics. Carry a reusable water bottle, use cloth bags instead of plastic ones, and try to avoid unnecessary packaging. Small changes collectively make a big \_\_\_\_\_.

**Select Missing Word:**

Dr. Turner: Energy-efficient appliances and using LED bulbs can significantly lower energy consumption. Also, remember to turn off lights and unplug devices when not in use. Conserving energy not only benefits the environment but also reduces \_\_\_\_\_ bills.
