

Directions for Questions 1 to 5 : Read the article carefully and answer the questions that follow. Choose one answer from among the four choices given :

Slower growth and deceleration in funding are making companies – including startups – across a range of sectors hire junior-level candidates in place of mid-level ones, according to multiple hiring platforms. In the case of tech firms, the trend is even more pronounced because, in addition to budget constraints, many of the new-age tech qualifications that companies need are more likely to be available among younger employees.

Online hiring firm Hiree has said that tech companies are now increasingly preferring people with experience of 1-3 years over those with experience of 3 years and more. It also noted that there's a 15% decline in the salary being offered to the junior-level employees. The data is based on the recruitment search patterns of over 400 companies, 60% of which comprised established startups, on the Hiree platform between October 2015 and February 2016. Almost 70% of the candidates surveyed were for tech roles by startups and corporates.

Mettl, an online assessment service that helps companies in recruitment, saw 40% of its assessments happening for candidates with 1-3 years of work experience in the January-March quarter, compared to 25% in the previous quarter. This was calculated from over 6 lakh assessments conducted by large and medium enterprises across IT, pharmacy, manufacturing, banking and automobile....

Hacker Earth, which organizes coding challenges for recruitment companies to understand the skillsets of candidates, also says hiring is shifting in favour of junior level candidates. "Also companies are now looking at particular skillsets rather than work experience. People with over six years of experience will not have technical expertise in Django or Python (programming languages needed for new-age tech apps)."

Ketan Kapoor, founder of Mettl, said companies are today a lot more focused on the skills of the people, and on young people with lesser experience if they can deliver the required output. Sunil Goel, MD of recruitment agency Global Hunt, said the concept of junior and senior roles in organizations is changing. "The pyramid of hierarchies is getting flattened", he said.
