Question Paper Preview

Question Paper Name: Subject Name: Duration:	Food Technology 11th May 2018 Shift2 Food Technology 120
	Food Technology
Display Number Panel: Group All Questions:	Yes No
	2203605641 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes ption Orientation: Vertical per residue in α helical structure of protein is
Options :	
1. 100°	
2. 120°	
3. 150°	
4. 260°	
Question Number : 2 Question Id : 2 Single Line Question Option : No O	2203605642 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes ption Orientation: Vertical is responsible for staling of bread.
Options:	
Gelatinization	
2. Retro gradation	
3. Hydrolysis of starch	
Baking of starch	

Which of the following vitamin is responsible for blood clotting?
Options: 1. Vitamin E
2. Vitamin D
3. Vitamin A
4. Vitamin K
Question Number: 4 Question Id: 2203605644 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Vitamin E favors the absorption of
Options: 1. Calcium
2. Phosphorus
3. Iron
4. Zinc
Question Number: 5 Question Id: 2203605645 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical The non-digestible carbohydrates are collectively known as
Options: 1. Fats
2. Fibers
3. Proteins
4. Minerals
Question Number: 6 Question Id: 2203605646 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical
One calorie of energy is equivalent to joules. Options:
collegedunia india's largeat Student Review Platform

```
\frac{1}{1} 3.821
2 2.328
3. 4.363
4. 4.184
Question Number: 7 Question Id: 2203605647 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical
The percentage of adsorbed nitrogen retained in the body represents
Options:
True protein value
, Net protein content
3 Biological value (bv) of protein
Calorific value
Question\ Number: 8\ Question\ Id: 2203605648\ Question\ Type: MCQ\ Option\ Shuffling: Yes\ Display\ Question\ Number: Yes\ Single\ Line\ Question\ Option: No\ Option\ Orientation: Vertical
 The red color of ripened tomato is due to pigment of
Options:
1 Xanthophyll
   Crytoxanthine
3. Carotenoids
4 Lycopene
Question Number: 9 Question Id: 2203605649 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical
Hydrogenation of oils decreases their nutritional quality by
  Increasing unsaturation of fatty acids
                                                                                                             collegedunia
```

Decreasing level of essential fatty acids
3. Decreasing saturation of fatty acids
Formation of trans-fatty acids
Question Number: 10 Question Id: 2203605650 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Peroxide value of stored oil indicates degree of
Options: 1. Hydrolysis
2. Reversion of oil
3. Oxidation of oil
4. Lipolysis
Question Number: 11 Question Id: 2203605651 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical The gluten formed in refined wheat flour during dough development is due to the
interaction of
Options: Albumin + Prolamin
Globulin + Glutelin
3. Prolamin + Glutelin
4. Albumin + Glutelin
Question Number: 12 Question Id: 2203605652 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical
The use of iodized salt is recommended for the prevention of disease.
Options:
1. Anameia

2 Goiter
Pellagra Pellagra
Beribery
Question Number: 13 Question Id: 2203605653 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Tofu is
Options: Maize protein
2. Wheat protein
Soybean protein
Rice protein
Question Number: 14 Question Id: 2203605654 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Which of the following cereals contain highest percentage of protein content?
Options: Sorghum 1.
2. Pearl Millet
3. Maize
Brown rice
Question Number: 15 Question Id: 2203605655 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical In case of jelly, the phenomenon of spontaneous exudation of fluid from a gel is
known as
Options: 1. Foggy jelly

collegedunia [India's Largest Student Review Platform

2. Weeping jelly
Synegy jelly
4. Cloudy jelly
Question Number: 16 Question Id: 2203605656 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Parboiling is used in Asian countries for grain processing. Parboiling technique is
generally applied to
Options:
1. Millets
2. Wheat
3. Maize
4. Rice
Question Number: 17 Question Id: 2203605657 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Khoa is prepared by continuous boiling of milk until desired concentration is
achieved. What is the percentage of total solids present in Khoa?
Options: 1. 75-78%
2. 82-85%
_{3.} 65-72%
4. 92-95%
Question Number: 18 Question Id: 2203605658 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical The finishing or end point of jam cannot be determined by
Options: Drop test

Jel test
Sheet test
4. Refractometer test
Question Number: 19 Question Id: 2203605659 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical The milling process results in some loss of food value. The refinement of cereal grains
results in the loss of which of the following vitamins?
Options : 1. C
B complex
3. K
$_{4}$ E
Question Number: 20 Question Id: 2203605660 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Which of the following is a good source of invert sugar?
Options: Apple
2. Potato
3. Banana
Honey
Question Number: 21 Question Id: 2203605661 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical
Options: Sunflower

Hops are used in manufacturing of
Options: 1. Wine
_{2.} Beer
3. Brandy
4. Vodka
Question Number: 32 Question Id: 2203605672 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Sauerkraut is prepared from
Options:
Fermented grapes
2. Fermented apples
Fermented cabbage
4. Fermented soyabean
Question Number: 33 Question Id: 2203605673 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Sarcina sickness in beer is caused by
Options:
Saccharomyces cerevisiae
Saccharomyces carlsbergensis
3. Zygomonas anaeroium
Pediococcus cerevisiae

Antibiotic "Nisin" is produced by

Options:

1. Achromobacter perolens

Pseudomonas graveolens
2.

3 Streptococcus lactis

Pseudomonas mucidolens

 $Question\ Number: 35\ Question\ Id: 2203605675\ Question\ Type: MCQ\ Option\ Shuffling: Yes\ Display\ Question\ Number: Yes\ Single\ Line\ Question\ Option: No\ Option\ Orientation: Vertical$

Fishy odour in eggs is caused by

Options:

Achromobacter perolens

, Enterobacter cloacae

3 Pseudomonas mucidolens

4 Escherichia coli

Question Number : 36 Question Id : 2203605676 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

An actively growing culture of *Acetobacter aceti* is added to vigorously aerated fermented fruit juice medium containing 10 g L⁻¹ ethanol to produce vinegar. After some time, the ethanol concentration in the medium is 0.8 g L⁻¹ and acetic acid produced is 8.4 g L⁻¹. What is the conversion efficiency of the process with respect to theoretical yield?

Options:

1 90

2.50

3 30

4. 70

Question Number: 37 Question Id: 2203605677 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Prolonged fermentation of cocoa seeds leads to "off-taste" due to the release of
Options: Carbon dioxide
2. Glucose
Short chain fatty acids
4. Phospholipids
Question Number : 38 Question Id : 2203605678 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical
Enzyme lipase is likely to attack fat globules
Options:
Before homogenization
2. After homogenization
Before cream separation
After pasteurization
Question Number : 39 Question Id : 2203605679 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical
Bacteriostatic method of food preservation
Options:
Destroys all bacteria
Extends stationery phase of bacterial growth
Kills all pathogenic bacteria only

4. Extends log phase of bacterial growth
Question Number: 40 Question Id: 2203605680 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Chief type of cells in the edible part of most of the fruits and vegetables are
Options:Epidermal cells
2. Parenchyma cells
3. Phloem
4. Xylem
Question Number: 41 Question Id: 2203605681 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Which of the following is a Gram positive bacteria?
Options: Listeria monocytogenes 1.
2. Proteus vulgaris
3. Salmonella typhi
4. Shigella dysenteriae
Question Number: 42 Question Id: 2203605682 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Thermal destruction of microorganisms follows kinetics.
Options:
Zero order
2. First order
3. Second order
4. Fractional order

Question Number: 43 Question Id: 2203605683 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Sauerkraut is a type of
Options :
1. Meat
Fermented cabbage
Fermented cereal based product
4 Wine
Question Number: 44 Question Id: 2203605684 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Which of the following organism is used in Tempeh production?
Options:
Aspergillus oryzae
2. Rhizopus oligosporus
Aspergillus niger
Neurospora sitophila
Question Number: 45 Question Id: 2203605685 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Cider is the product obtained from the fermentation of
Options: 1. Plum
Peach
Apple Apple
Distillation of wine

Red milk is caused by species of
Options:
Pseudomonas
2. Serratia
3. Geotrichum
4. Aspergillus
Question Number: 47 Question Id: 2203605687 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical
Sulfide stinker is caused by
Options:
Penicillium spp.
Clostridium nigrificans
Bacillus spp.
Alcaligenes viscolactis
Question Number: 48 Question Id: 2203605688 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Kinchi is also known as
Options:
pickled cucumber
pickled olives
2
pickled onion
4. pickled cabbage

Ale is made from
Options:
fruits
1
2. vegetables
_{3.} malt
4. carrots
Question Number: 50 Question Id: 2203605690 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Suspected colonies of Staphylococcus aureus when grown on Baird-Parker medium
shall show
Options:
Coagulase activity
2. Protease activity
3. Catalase activity
4. Invertase activity
Question Number: 51 Question Id: 2203605691 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical
The vitamin injected in new born is
Options:
Vitamin A
2. Vitamin B1
3. Vitamin C
4. Vitamin K

Red colour in water melon is due to
Options:
1. Lycopene
2. Chlorophyll
Xanthophyll 3.
Gibberellin 4.
Question Number: 53 Question Id: 2203605693 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical ICMR recommendations for daily dietary intake of vitamins A and C by an adult
Indian man are
Options: 350 μg retinol and 25 mg vitamin C
_{2.} 600 μg retinol and 40 mg vitamin C
450 μg retinol and 25 mg vitamin C
750 μg retinol and 40 mg vitamin C
Question Number: 54 Question Id: 2203605694 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Slaughter house is also known as
Options:
Pilot plant
2. Bakery
3. Closet
4. Abattoir

What does Glycemic Index of a carbohydrate show?
Options:
It shows which other nutrient it is being ingested with
2. It shows how quickly a carbohydrate increases blood sugar levels
3. It shows how quickly a carbohydrate is digested
It shows the amount of glycine present
Question Number: 56 Question Id: 2203605696 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical In wheat dough, starch is converted into sugar by the action of
Options:
_{1.} Zymase
2. Protease
Lipase 3.
Amylase 4.
Question Number: 57 Question Id: 2203605697 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Naturally occurring pigments in foods are generally water-soluble. Identify the one
pigment which is oil soluble
Options:
Curcumin
2. Anthocyanins
3. Carotenes
4. Betalains

 $Question\ Number: 58\ Question\ Id: 2203605698\ Question\ Type: MCQ\ Option\ Shuffling: Yes\ Display\ Question\ Single\ Line\ Question\ Option: No\ Option\ Orientation: Vertical$

Options: Diallyl disulfide
Diacetyl
Benzaldehyde 3.
Ethyl butyrate
Question Number: 60 Question Id: 2203605700 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical
The sweetest sugar is
Options:
1. Glucose
_{2.} Fructose
3. Sucrose
4. Galactose

 $Question\ Number: 61\ Question\ Id: 2203605701\ Question\ Type: MCQ\ Option\ Shuffling: Yes\ Display\ Question\ Number: Yes\ Single\ Line\ Question\ Option: No\ Option\ Orientation: Vertical$

Which of the below vitamins is an antioxidant?

Food or part of a food that may impart medical or health benefits including treatment
or prevention of diseases is known as
Options: Nutraceutical
Pharmaceutical
Drug
Specialty food
Question Number: 62 Question Id: 2203605702 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Green tea is considered to be a more healthy option than black tea because
It has high content of polyphenols
It does not require any sweetener during tea preparation
It is richer in the arubigin
It has no microbial load
Question Number: 63 Question Id: 2203605703 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical The common name for semolina is
Options: Dalia
Rava
Seiji Seiji
Su

Pheophytin is	in colour.	
Options:		
1. red		
_{2.} brown		
purple 3.		
4. yellow		
Question Number: 65 Question Id: 2203605 Single Line Question Option: No Option Ori Koumiss was traditionally		: Yes Display Question Number : Yes _ milk.
Options:		
1. Goat		
_{2.} Sheep		
_{3.} Mare		
4. Cow		
Single Line Question Option : No Option Ori Marbling refers to Options :		: Yes Display Question Number : Yes
intra muscular		
_{2.} muscular		
3. total		
subcutaneous 4.		
Question Number: 67 Question Id: 2203605 Single Line Question Option: No Option Ori Unplanned crystallization		

Options:

winnowing
panning 2.
engrossing
4. fudging
Question Number : 68 Question Id : 2203605708 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical
The objective of dry milling of corn is to
Options: Remove endosperm and bran and recover germ
Remove bran and germ and recover endosperm
Remove bran and germ and recover starch
Remove starch and bran and recover germ
Question Number : 69 Question Id : 2203605709 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical
Which of the followings is NOT the objective of parboiling of paddy?
Options:
Reduction of nutrients during milling
Increasing total and head yield of rice
Salvaging wet and damaged paddy
preventing rice from microbial spoilage
Question Number : 70 Question Id : 2203605710 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical
In controlled atmospheric storage gas is used.
Options : Collegedunia India's largest Student Review Platform

$_{1.}\mathrm{CO}_{2}$

3. H ₂
4. Oxygen
Question Number: 71 Question Id: 2203605711 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical
On cooking, nitric myoglobin of cured meat is converted to
Options: 1. Nitrosomyoglobin
2. Nitrosohemocyanin
3. Nitrosohemoglobin
4. Nitrosohemochrome
Question Number : 72 Question Id : 2203605712 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical
The eggs are pasteurized to kill particularly organisms.
Options:
1. Streptococcus
2. Salmonella
3. Staphylococcus
4. Micrococcus
Question Number: 73 Question Id: 2203605713 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical
Heating of frozen food is termed as
Options: Dehydro freezing

- Thawing Freeze drying 4 Melting Question Number: 74 Question Id: 2203605714 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical In the process of milling of wheat it is tempered before grinding by treating with water because **Options:** Endosperm will be tough and readily separated from the bran Bran will be tough and readily separated from the endosperm This practice is followed traditionally 4 to soften bran for easy separation Question Number: 75 Question Id: 2203605715 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical The main function of stabilizers in ice-cream is to **Options:** Improve and provide uniform whipping quality
- Produce a drier ice-cream with smoother body and texture
- 3 Prevent formation of ice crystals
- Prevent decomposition

Question Number: 76 Question Id: 2203605716 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical

Which of the following equation is a fundamental relation for all radiant energy

transfer calculation?

Options:

1. Kirchhoff
Stephen-Boltzmann
Newton .
4. Gauss
Question Number: 77 Question Id: 2203605717 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Which of the following is used to measure local or point velocity?
Options: Rotameter
Orifice meter
3. Pitot tube
Venturi meter
Question Number: 78 Question Id: 2203605718 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical SI unit for overall heat transfer coefficient is
Options:
$_{1}$ W/(m ² K)
$_{2}$ (m 2 K)/W
$^{3.}$ Wm 2 K
$_{4.}$ WK/m ²
Question Number: 79 Question Id: 2203605719 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Vertical screw mixers are used for mixing of
Options:

Options:	
1. Liquid- liquid extraction	
2. Solid- liquid extraction	
3. Solid-solid extraction	
Gas-liquid extraction	
Question Number: 82 Question Id: 2203605722 Question Type: MCQ Option Shuffling: Yes Display Question Single Line Question Option: No Option Orientation: Vertical Reynold's number is	Number : Yes
Options:	
Ratio between inertial force and viscous force	collegedunia

- 2 Ratio between viscous force and inertial force
- 3 Ratio between inertial force and pressure
- Ratio between viscous force and pressure difference

Question Number: 83 Question Id: 2203605723 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical

Which of the following is a Newtonian fluid?

Options

- Sewage sludge
- Tomato ketchup
- 3 Sand filled emulsions
- 4 Castor oil

Question Number: 84 Question Id: 2203605724 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical

Which of the following mixer is mismatched below?

Options:

- Ribbon mixers dry powder and particulate foods
- Paddle agitators low or medium viscosity liquids
- Z-blade mixers high viscosity liquids and paste
- Sigma blade mixers low viscosity foods

Question Number: 85 Question Id: 2203605725 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical

In case of Fluidized bed drier, the term "Fluidized bed" is used because

Options:

Fluid bed is used for drying

- , Fluid bed is formed during drying
- 3 Bed of solid particles becomes fluid
- 4 Bed of solid particles behave like fluid

Question Number: 86 Question Id: 2203605726 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical

How many fold would the g-number of a centrifuge increase by doubling both spinning speed and bowl diameter?

Options:

- 1 2
- , 4
- 3. 8
- 4 16

Question Number: 87 Question Id: 2203605727 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical

Which of the following laws is associated with crushing energy requirement?

Options:

- Kopp's law
- , Fourier's law
- 3 Fick's law
- 4 Rittinger's law

Question Number: 88 Question Id: 2203605728 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical

In a pipe flow the relationship between a maximum velocity and the mean velocity

flow across a cross-section at any time is given by

Options:

 $V_{\text{max}} = 2 \times V_{\text{mean}}$

$V_{\max} = 4 \times V_{\max}$	
$V_{\max} = V_{\max}$	
$V_{\text{max}} = 8 \times V_{\text{mean}}$	
Question Number: 89 Question Id: 2203605729 Question Type Single Line Question Option: No Option Orientation: Vertical	
Heat can be transmitted by	mode across absolute vacuum.
Options: conduction 1.	
_{2.} convection	
3. radiation	
conduction & convection	
Question Number: 90 Question Id: 2203605730 Question Type Single Line Question Option: No Option Orientation: Vertical What is the nature of the variation of the	: MCQ Option Shuffling : Yes Display Question Number : Yes he filtrate volume with time for a constant
pressure filtration?	
Options: 1. Parabola	
Hyperbola 2.	
Exponential curve	
Straight line	
Question Number: 91 Question Id: 2203605731 Question Type Single Line Question Option: No Option Orientation: Vertical Baffles are used to	: MCQ Option Shuffling : Yes Display Question Number : Yes
Options:	
improve the rate of mixing	~~ ~
	collegedunia India's Largeat Student Review Platform

2 minimize the vortex formation
improve rate of mixing & to minimize vortex formation
decrease the rate of mixing
Question Number: 92 Question Id: 2203605732 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical Which of the following process variables can be changed when extruder is running? Options: Die design
2. Screw configuration
3. Screw speed
4. Rotating knife design
Question Number : 93 Question Id : 2203605733 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical Dry cleaning method that uses principle of difference in density is
Options: Screening
2. Aspiration
Magnetic cleaning
Electrostatic cleaning
Question Number : 94 Question Id : 2203605734 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical
is not a true filtration process, because the separation is not solely
based on particle size.
Options: 1. Microfiltration

2. Ultrafiltration
3. Reverse Osmosis
4. Distillation
Question Number: 95 Question Id: 2203605735 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Single Line Question Option: No Option Orientation: Vertical 100 kg of orange juice is to be dried from 60% to 20% moisture (by weight). The
mass of moisture removed in kg is
Options:
