Each passage in this section is followed by questions based on its content. After reading the passage, choose the best answer to each question. Answer all questions following the passage on the basis of what is stated or implied in that passage.

Today I Rabindranath Tagore complete eighty years of my life. As I look back on the vast stretch of years that lie behind me and see in clear perspective the history of my early development, I am struck by the change that has taken place both in my own attitude and in the psychology of my countrymen -- a change that carries within it a cause of profound Our direct contact with the larger world of men was linked up with the contemporary history of the English people whom we came to know in those earlier days. It was mainly through their mighty literature that we formed our ideas with regard to these newcomers to our Indian shores. In those days the type of learning that was served out to us was neither plentiful nor diverse, nor was the spirit of scientific enquiry very much in evidence. Thus their scope being strictly limited, the educated of those days had recourse to English language and literature. Their days and nights were eloquent with the stately declamations of Burke, with Macaulay's long-rolling sentences; discussions centered upon Shakespeare's drama and Byron's poetry and above all upon the large-hearted liberalism of the nineteenth-century English politics.

At the time though tentative attempts were being made to gain our national independence, at heart we had not lost faith in the generosity of the English race. This belief was so firmly rooted in the sentiments of our leaders as to lead them to hope that the victor would of his own grace pave the path of freedom for the vanquished. This belief was based upon the fact that England at the time provided a shelter to all those who had to flee from persecution in their own country. Political martyrs who had suffered for the honour of their people were accorded unreserved welcome at the hands of the English.

I was impressed by this evidence of liberal humanity in the character of the English and thus I was led to set them on the pedestal of my highest respect. This generosity in their national character had not yet been vitiated by imperialist pride. About this time, as a boy in England, I had the opportunity of listening to the speeches of John Bright, both in and outside Parliament. The large-hearted, radical liberalism of those speeches, overflowing all narrow national bounds, had made so deep an impression on my mind that something of it lingers even today, even in these days of graceless disillusionment.

Man's growth from barbarism into civilization is supposed to be the theme of history. But sometimes, looking at great stretches of history, it is difficult to believe that this ideal has made such progress or that we are very much civilized or advanced. There is enough of want of co-operation today, of one country or people selfishly attacking or oppressing another, of one man exploiting another.

It is well to remember that man in many ways has not made very great progress from other animals. It may be that in certain ways some animals are superior to him. Still we look down upon insects as almost the lowest of living things and yet the tiny bees and ants have learnt the art of cooperation and of sacrifice for the common good far better than man. If mutual cooperation and sacrifice for the good of society are the test of civilization we may say that the bees and ants are in this respect superior to man. In one of our old Sanskrit books there is a verse which can be translated as follows: "for the family, sacrifice the individual for the community, the family, for the country, the community, and for the soul, the whole world". What the soul is few of us can know or tell and each one of us can interpret it in a different way. But the lesson this Sanskrit verse teaches us is the same lesson of cooperation and sacrifice for the larger good. We in India, had forgotten this sovereign path to real greatness for many a day we had so fallen. But again we seem to have glimpses of it and all the country is astir. How wonderful it is to see men and women, and boy and girls, similarly going ahead in India's cause and caring about any pain or suffering? Well may they smile and be gladdened for the joy of serving a great cause which is their and those who are fortunate, comes the joy of sacrifice also.
