Frequently Asked Questions

Ques. Is the Bihar board science syllabus enough for the CUET exam for a BSc?

Ans. The syllabus for Bihar Board Science is not enough for the exam when you are applying for a BSc degree. While it is good to develop a strong base in the domain subjects which include Physics, Chemistry, Biology, or Mathematics, you need to pair other sources of information to broaden your knowledge. Common University Entrance Test checks your analytical, logical, and reasoning skills that require an in-depth idea of the subjects.

Ques. What are the difficulty levels in the CUET exam in 2024?

Ans. The difficulty level of any exam is partly determined by your preparation and partly by the difficulty index that measures the number of questions correctly answered by the total candidates who appeared for the test. Kim Sharma a CUET Exam topper said “It is not very difficult to qualify the exam as it is not similar to JEE or NEET. However, it is not a piece of cake either.” According to Kim, if you dedicate 2 months thoroughly to CUET preparation after boards and take mock tests, you will be halfway through the syllabus. Spending time and money on coaching is what a lot of aspirants do but that is not a compulsion to score well. The only way to succeed any test is to reserve time for revision. Kim also added that she chose to buy online mock tests instead of spending on coaching and travel. While you can do things others do; it is always recommended to use your sixth sense and act as per your comfort. Kim’s subjects were History, Political Science, English, and Economics; and she secured 771/800 adhering to self-preparation mode.
