

CUET PG Psychology Solution 2024

Ques 1. Which psychology school/ approach is related to AI?

- a. Social
- b. Cognitive
- c. Behavioral
- d. Psychodynamic

Solu. Cognitive psychology (b) is associated with AI, focusing on mental processes like learning, memory, and problem-solving.

Ques 2. The brain interpretation of a neural impulse

- a. Sensation
- b. Percentage
- c. Stimulation
- d. Memory

Solu. The brain interprets a neural impulse as Sensation (a), the process by which our sensory organs detect and respond to stimuli.

Ques 3. size of the pupil is regulated by

- a. Iris
- b. Lens
- c. Retina
- d. Cornea

Solu. The size of the pupil is regulated by the Iris (a), which contracts or expands to control the amount of light entering the eye based on environmental conditions.

Ques 4. Interference question

Solu.

Ques 5. Difficulty index and discrimination index

Solu.

Ques 6. Match the following for Intelligence, ratio schedules, levels of measurement, Emotion theories

Solu.

Ques 7. According to B.F. Skinner which is commonly used to control human behavior

- a. reinforcement**
- b. punishment**
- c. extinction**
- d. Generalization**

Solu. According to B.F. Skinner, reinforcement (a) like rewards or positive feedback is commonly used to control human behavior, reinforcing desired actions.

Ques 8. Which of the following is most common symptom in neurosis

- a. Hallucination**
- b. high anxiety**
- c. Irender**

Solu. Functionalism suggests that psychological processes serve adaptive functions through the mind, emphasizing the purpose and utility of mental processes in helping individuals survive and thrive.

Ques 13. Arrange Flow of neural transmission=

- a. Optic nerve,**
- b. receptor cell,**
- c. ganglial cell,**

d. bipolar cell (RBGO)

Solu. Flow of neural transmission: receptor cell (b) receives stimuli, bipolar cell (d) transmits signals to ganglial cell (c), which then sends signals via the optic nerve (a) to the brain for processing.

Ques 14. Attention help in memory by

- a. Limiting it**
- b. Enhancing**
- c. Directing**

Solu. Attention enhances (b) memory by selectively focusing on relevant information, aiding in encoding and retrieval processes.

Ques 15. Which is not part The central brain

- a. Hypothalamus**
- b. Pons**
- c. Medulla**
- d. Temporal lobe**

Solu. The Temporal lobe (d) is not part of the central brain, but rather a region involved in auditory processing, memory, and language.

Ques 16. Which is based on formal and informal instructions-

- a. Fluid**
- b. Crystalize**
- c. Operant**
- d. G factor**

Solu. Crystalized intelligence (b) is based on formal and informal instructions, representing acquired knowledge and skills accumulated over time.

Ques 17. which parenting style fails to set limits of their growing child

a. Authoritative

b. Authoritarian

c. Permissive
