**Answer:** B

63. During his 69<sup>th</sup> Independence day address to the Nation, The Indian Prime Minister had emphasized government's commitment to simplify labour laws which are confusing for the common man. Among the reforms proposed and passed in Indian parliament all except one is true. Find the odd one.

- A** Scrapping of Apprentice Act, 1961
- B** Universal Account Number for every member of Employees' Provident Fund Scheme
- C** Transparent Labour Inspection Scheme
- D** Launch of Unified Labour Portal

**Answer:** A

## CAT Previous Papers PDF

### Logical Reasoning

64. Nilofer decides to distribute 200 chocolates equally to her students. But, 2 of her older students come and she has to redistribute the same chocolates to all of them now. Now, her present students get 5 chocolates lesser than what they were getting earlier. So, Nilofer's present students are:-

- A** 10
- B** 8
- C** 7
- D** 15

**Answer:** B

**Explanation:**

Let the total number of students earlier = n

After 2 old students comes, total number of students = n + 2

Given that,

total number of chocolates = 200

So, earlier, chocolate for each students =  $200 / n$

When 2 students joins, chocolate for each students =  $200 / n + 2$

According to Question,

$$(200 / n) - 5 = 200 / (n + 2)$$

$$(n + 2) (200 - 5n) = 200n$$

$$5n^2 + 10n - 400 = 0$$

$$5n^2 + 50n - 40n - 400 = 0$$

$$5n(n + 10) - 40(n + 10) = 0$$

$$n = 8$$

Thus number of students earlier = 8

## XAT Previous Papers PDF

65. Rimi was born on 3/3/2012. Rima was born 13 days before Rimi. If Rimi was born on a Saturday, what was the day on which Rima was born?

- A Saturday
- B Sunday
- C Friday
- D Monday

**Answer: B**

**Explanation:**

If rimi was born on Saturday.

Then Rima was born 13 days before.

So there is Sunday.

As 1 week has 7 days.

So  $13 - 7 = 6$

As rima was born 7 days before then there will be Saturday. ATQ we have 6 days left if you will deduct 6 days from Saturday so there will be Sunday And the date would be 19/2/2012

66. Frank, Fardeen, Faulad and Farhan are playing a game where the loser doubles the amount of money that the others have. They manage to play four games. Each player loses a game each as per reverse alphabetical orders of their names. At the end of the game each player was left with ₹32 each. Who started with the most money at the beginning of the game?

- A Faulad
- B Farhan
- C Frank
- D Fardeen

**Answer: C**

**Explanation:**

At end of the game each player holds = 32

Total money is  $4 \times 32 = \text{Rs. } 128$

Let Frank start with Rs.  $x$

Then the total money other 3 have = Rs.  $(128 - x)$

Frank lost the first game. He gives Rs.  $(128 - x)$  to the other 3 players.

Therefore, after the 1st game, money that Frank has

$$=x-(128-x)=2x-128$$

Total money other 3 players have  $=2(128-x)$

In the second, third, and fourth games, the other 3 partners will lose, and each time, the loser doubles the amount of money that the others have.

i.e., after 2nd game, Fardeen's money  $=2(2x-128)$

i.e., after 3rd game, Faulad 's money  $=4(2x-128)$

i.e., after the 4th game, Farhan's money  $=8(2x-128)$

At the start of the game, Frank started with 66rs.

67. Ranbir's office door faces eastwards. He walks out from his office's back door upto a 100 metres and then towards Right, walks further 100 metres, turns left and walks 50 metres. Which Direction has he reached now?

- A North-West
- B South-West
- C North
- D South

**Answer:** A

**Explanation:**

He starts towards the west, walks 100 meters. Turns towards the north walk 100 meters. Turns towards the west and walks 50 meters. Hence Final position = North- west.

## Top-500 Free CAT Questions (With Solutions)

68. Two Arms of a clock come over each other in approximately how many minutes?

- A 59
- B 60
- C 65
- D 55

**Answer:** C

**Explanation:**

In T hours, the minute hand completes T laps. In the same amount of time, the hour hand completes  $T/12$  laps.

The first time the minute and hour hands overlap, the minute hand would have completed 1 lap more than the hour hand. So we have  $T = T/12 + 1$ . This implies that the first overlap happens after  $T = 12/11$  hours (~1:05 am). Similarly, the second time they overlap, the minute hand would have completed two more laps than the hour hand. So for N overlaps, we have  $T = T/12 + N$ .

Since we have 24 hours in a day, we can solve the above equation for N

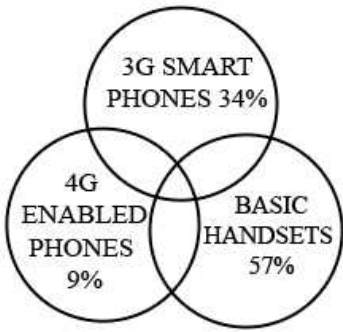

$$24 = 24/12 + N$$

$$24 = 2 + N$$

$$N = 22$$

Thus, the hands of a clock overlap 22 times a day. Thus the hands of the clock overlap at 12:00, ~1:05, ~2:10, ~3:15, ~4:20, ~5:25, ~6:30, ~7:35, ~8:40, ~9:45, ~10:50. Note that there is no ~11:55. This becomes 12:00.

Hence they meet every 65 min

**MOBILE HAND SET USERS SURVEY DATA**

If the total number of respondents surveyed who use 4G Enabled Mobile Hand Sets are 3591, then the number of 3G Smart Phone users surveyed are?

- A 13990
- B 14566
- C 13566
- D 14990

**Answer: C**

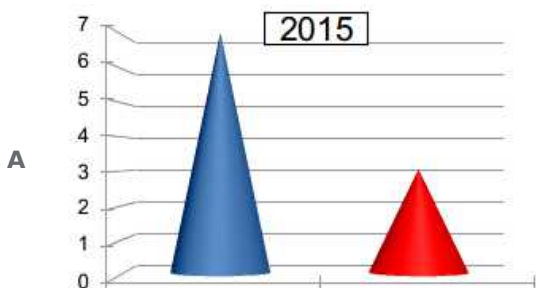

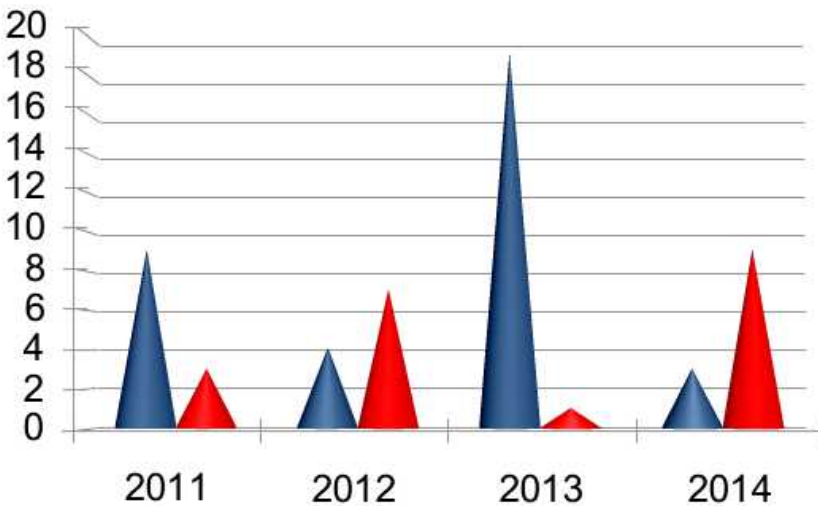

**Explanation:**

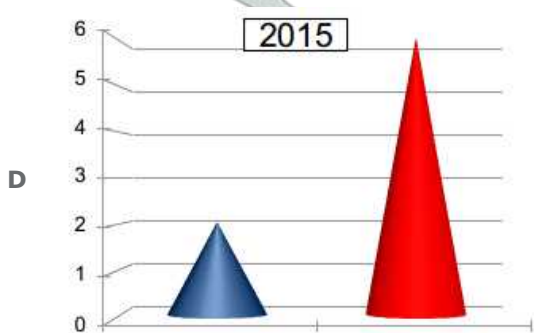

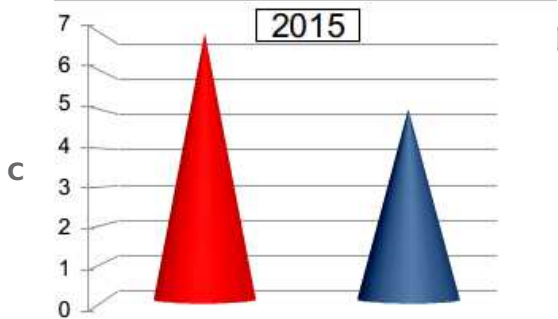

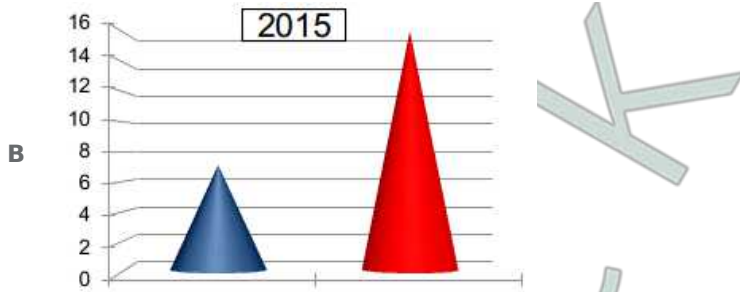

9% of total number of respondents surveyed = 3591

⇒ Total number of respondents surveyed = 39900

∴ Number of 3G Smart Phone users surveyed = 34% of 39900 =  $\frac{34}{100} \times 39900 = 13566$

70. Find the sequence that shall follow in 2015 based on the data given in the chart below.

**Answer: C**

**Explanation:**

A and B are alternately being increased and decreased.

**Take a XAT Free Mock Test**

71. The table shows the Percentage of total population of a city as per their age groups.

AGE GROUP	PERCENT
< 15	30.00
16-25	17.75
26-35	17.25
36-45	14.50
46-55	14.25
56-65	5.12
65 >	1.13
Total	100

If there are about 190000 people in the age group of 56-65 in that city then what is the approximate number of people in the age bracket 26-35 in the city?

- A** 14,25,000
- B** 6,53,000
- C** 6,40,000
- D** 11,10,000

**Answer: C**

**Explanation:**

190000 people in the age group of 56-65 => 5.12% of total = 190000

number of people in the age bracket 26-35 in the city = 17.25% of total =  $17.25 \times 190000 / 5.12 = 640000$

72. The Sum of Three Consecutive Prime Numbers is 83. What shall be the Square of the largest amongst the three numbers if its digits are reversed?

- A 169
- B 83
- C 961
- D 31

**Answer: A**

**Explanation:**

The prime numbers are 2,3,5,7,11,13,17,19,23,29, 31,37...

Three Consecutive Prime Numbers whose sum is 83 are 23,29,31

Reverse of largest number =13

Square = 169

73. The number of ways in which Arnav, Ananyaa, Deepali and Neena can stand in straight line such that Deepali comes between Arnav and Ananyaa & also Neena does not come between Arnav and Ananyaa is?

- A 8
- B 6
- C 12
- D 4

**Answer: D**

**Explanation:**

The possibilities are

Neena - Arnav - Deepali - Ananyaa

Neena - Ananyaa - Deepali - Arnav

Arnav - Deepali - Ananyaa - Neena

Ananyaa - Deepali - Arnav - Neena

**Take a CMAT free mock test**

74. What shall come in place of '?' in the series given below?

W	161	G
U	357	Q
R	?	M
N	266	S

- A 247
- B 234
- C 221

**D** 252

**Answer: B**

**Explanation:**

The logic here is

$$W = 23, G = 7 \rightarrow 23 \times 7 = 161$$

$$U = 21, Q = 17 \rightarrow 21 \times 17 = 357$$

$$N = 14, S = 19 \rightarrow 14 \times 19 = 266$$

Similarly,

$$R = 18, M = 13 \rightarrow 18 \times 13 = 234$$

$\therefore$  The required number = 234

Hence, the correct answer is Option B

75. **Amrita, during her trek in a Jungle finds a rectangular log of wood measuring 6cm X 12cm X 15cm. She wants to cut this log into exact number of wooden cubes. What is the number of such cubes of equal size that she can get by using the entire log?**

**A** 1080

**B** 27

**C** 40

**D** 1

**Answer: C**

**Explanation:**

HCF of 6, 12 and 15 is 3, so Amrita can cut cubes of side 3 cm.

$$\text{Total no. of cubes} = \frac{6 \times 12 \times 15}{3^3} = 40$$

76. **In a camp there is provision of meals for either 120 adults or 200 children. If 150 children have already eaten, then how many adults could be fed with the remaining meals?**

**A** 38

**B** 32

**C** 30

**D** 34

**Answer: C**

**Explanation:**

Let there be 600kg of rice.

Each adult eats = 5kg

Each child eats = 3kg

150 children eat =  $150 \times 3 = 450$  kg

Remaining rice = 150kg

Number of adults that can be fed =  $150/5=30$

**Take a free SNAP mock test**

77. A Telecom Service operator announced that between 8 PM and 8 AM all outgoing calls and text messages shall be charged @ 50 % of the charge rate as applicable from 8 AM to 8 PM. After availing of this benefit, my bill dues reduced by 20 %. What is the ratio of my calls and SMS during day and night time?

- A 2 : 3
- B 2 : 1
- C 3 : 2
- D 3 : 1

**Answer: C**

**Explanation:**

Let the ratio of messages during day and night be  $x:y$ .

Let the charge of messages during the day be 100, so the charge of messages during the night will be 50.

Initial total bill =  $100 \times (x+y)$

New total bill =  $100 \times x + 50 \times y = 50 \times (2x+y)$

$$\text{Now, } \frac{50 \times (2x+y)}{100 \times (x+y)} = \frac{80}{100}$$

$$10x + 5y = 8x + 8y$$

$$x:y=3:2$$

78. The roads to travel to various cities from point A are as given.

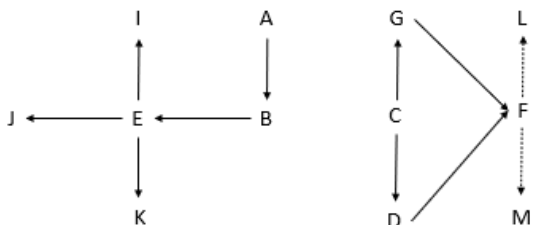

I, J and K can be reached only from E. E cannot be reached from D or C. A leads to B and from C, you can reach G. B leads to E. D can be reached from C. D leads to F. G also leads to F. L can be reached only from G via F. M can only be reached from D via F. All distances between two places are 1 km. All ways are one-way only.  
I, J and K can only be reached from?

- A A
- B E
- C C
- D B

**Answer: B**

**Explanation:**

Using the conditions given in the question, the path diagram is as given below.

Thus, I, J and K can only be reached from E.

Hence, the answer is option B.

79. What shall come in place of '=' in the series given below?

$$A D I = Y$$

- A V
- B Q

C P

D O

**Answer:** C

**Explanation:**

Let the letters be numbered as A=1, B=2 ..... Z=26

$$D - A = 4 - 1 = 3$$

$$I - D = 9 - 4 = 5$$

$$P - I = 16 - 9 = 7$$

$$Y - P = 25 - 16 = 9$$

∴ P should come in the place of '?' in the given series.

Hence, the correct answer is Option C

## Take a NMAT free mock test

80. Find the missing Number?

64	216	512
1000	1728	2744
4096	?	8000

A 6400

B 5842

C 5832

D 5840

**Answer:** C

**Explanation:**

The logic here is

$$64 = 4^3$$

$$1000 = 10^3$$

$$4096 = 16^3 \text{ and}$$

$$512 = 8^3$$

$$2744 = 14^3$$

$$8000 = 20^3$$

The difference is 6

Similarly,

$$216 = 6^3$$

$$1728 = 12^3$$

$$5832 = 18^3$$

∴ The required number is 5832

81. Which of the following shall come in place of missing '-'?

m n o n o m - m - m n o - o -

- A mnoo
- B onnm
- C mnno
- D mnom

**Answer:** B

**Explanation:**

The first three letters (m n o) becomes (n o m) the next three letters. Similarly, now (n o m) becomes (o m n).

So the missing letters are (o n n m)

82. The roads to travel to various cities from point A are as given.

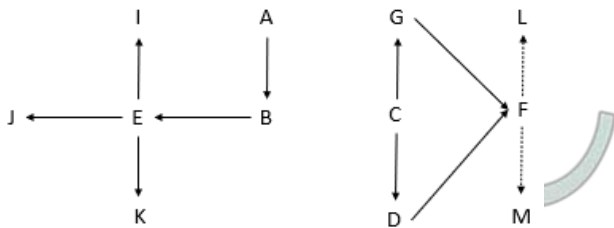

I, J and K can be reached only from E. E cannot be reached from D or C. A leads to B and from C, you can reach G. B leads to E. D can be reached from C. D leads to F. G also leads to F. L can be reached only from G via F. M can only be reached from D via F. All distances between two places are 1 km. All ways are one-way only. If one reaches D, one can go to?

- A F and M Only
- B F only
- C J and G
- D F and L

**Answer:** A

**Explanation:**

Using the conditions given in the question, the path diagram is as follows.

From D, one can only go to F and to M.

Hence, the answer is option A.

[Download IIFT Previous papers PDF](#)

83. The roads to travel to various cities from point A are as given.

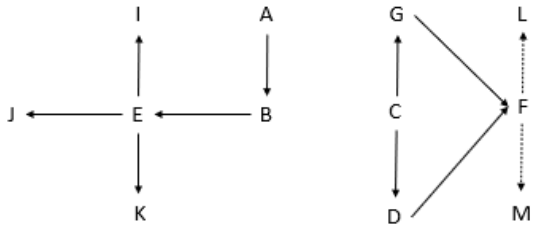

I, J and K can be reached only from E. E cannot be reached from D or C. A leads to B and from C, you can reach G. B leads to E. D can be reached from C. D leads to F. G also leads to F. L can be reached only from G via F. M can only be reached from D via F. All distances between two places are 1 km. All ways are one-way only. To reach M, one must have travelled through?

- A G and F
- B C and D
- C B
- D B and K

**Answer:** B

**Explanation:**

Using the conditions given in the question, the path diagram is as given below.

To reach M, the path is C-D-F-M.

Thus, one must have travelled through C and D to reach M.

Hence, the answer is option B.

84. Two Statements are followed by two conclusion I and II. Mark your answer as:-

**Statement:**

All students in my college are intelligent.

Rahul is not intelligent

**Conclusion:**

I. Rahul is not from my college.

II. Rahul should study more.

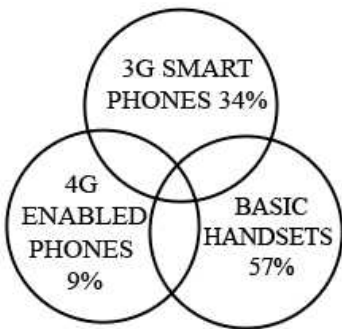

- A if only Conclusion I follows
- B if only Conclusion II follows
- C If both I and II follow
- D If Neither I nor II follows.

**Answer:** A

**Explanation:**

As per the two statements, we can only conclude conclusion I and whether Rahul should study more or not we cannot infer from the above statements.

85.

MOBILE HAND SET USERS SURVEY DATA

If the Survey was to be conducted on 10% less respondents then the Basic Hand Set Users shall be approximately?

- A 22469
- B 20469
- C 22473
- D 20743

**Answer:** B

**Explanation:**

From the previous question, we know that the total number of respondents surveyed = 39900

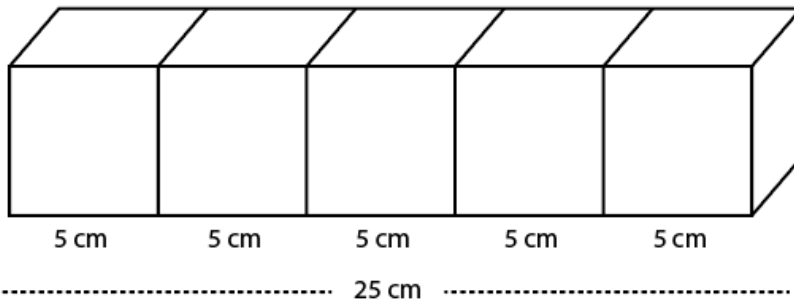

If there were 10% fewer respondents, the total =  $0.9 \times 39900 = 35910$

Thus, Basic handset users =  $0.57 \times 35910 = 20468.7 \approx 20469$

Hence, the answer is option B.

## XAT Previous Papers

86.

Alka places five Ice Cubes from the freezer, each of sides 5 centimeters each adjacent to each other. Find the area of the resultant cuboid that gets formed?

- A  $650 \text{ cm}^2$
- B  $125 \text{ cm}^2$
- C  $625 \text{ cm}^2$
- D  $550 \text{ cm}^2$

**Answer:** D

### Explanation:

According to the problem,

Length of the cuboid (l) = 25 cm

Breadth of the cuboid (b) = 5 cm

Height of the cuboid (h) = 5 cm

Surface area of cuboid =  $2(lb+bh+lh) = 2(125+25+125) = 2(275) = 550 \text{ cm}^2$

## CMAT Free Solved Previous Papers.

### Mathematics

87. A vase made of glass, when sold for ₹9,600 fetches 20% profit. What would be the percent profit/loss if 15 such vases are sold at a whole-sale price of ₹8,250 each?

- A 3%
- B 4%
- C 2%
- D 1%

**Answer:** A

### Explanation:

Selling price of a vase = Rs. 9600 and profit % = 20%

$$\Rightarrow \text{Cost price} = \frac{9600}{100+20} \times 100 = \text{Rs. } 8000$$

New Selling price of each vase = Rs. 8250

$$\Rightarrow \text{Profit \%} = \frac{8250-8000}{8000} \times 100$$

$$= \frac{250}{80} \approx 3\%$$

$\Rightarrow$  Ans - (A)

## MAT Free Solved Previous Papers

88. Two numbers are such that the ratio between them is 3:5. If each is increased by 10, the ratio between them becomes 5:7. What is the difference between the two numbers?

- A 5
- B 10
- C 12
- D 15

**Answer:** B

**Explanation:**

Let the numbers be  $3x$  and  $5x$

According to question,

$$\Rightarrow \frac{3x+10}{5x+10} = \frac{5}{7}$$

$$\Rightarrow 21x + 70 = 25x + 50$$

$$\Rightarrow 4x = 20$$

$$\Rightarrow x = \frac{20}{4} = 5$$

$$\therefore \text{Difference} = 2x = 2 \times 5 = 10$$

$\Rightarrow$  Ans - (B)

89. The average of 50 numbers is X. If two numbers 53 and 47 are discarded, the average of the remaining set of numbers now is 37.5. What is the value of 50X?

- A 1700
- B 1900
- C 1850
- D 1950

**Answer:** B

**Explanation:**

Sum of 50 numbers =  $50x$

$$\text{After removing 53 and 47, average of 48 numbers} = \frac{50x-53-47}{48} = 37.5$$

$$\Rightarrow 50x - 100 = \frac{75}{2} \times 48$$

$$\Rightarrow 50x = 1800 + 100 = 1900$$

$\Rightarrow$  Ans - (B)

90. If  $x^{abc} = x^a \cdot x^b \cdot x^c$ , where  $a, b, c$  and  $x$  are all positive integers, then what is the value of  $(a + b + c)^2$ ?

- A 25
- B 1
- C 49
- D 36

**Answer:** D

**Explanation:**

Given :  $x^{abc} = x^a \cdot x^b \cdot x^c$

$\Rightarrow x^{abc} = x^{(a+b+c)}$

$\Rightarrow a + b + c = abc$

$\therefore a, b, c$  are all positive integers, the only numbers that can satisfy above equation are :  $a = 1, b = 2, c = 3$

To find :  $(a + b + c)^2 = (6)^2 = 36$

$\Rightarrow$  Ans - (D)

### Take 3 Free CAT Mocks (With Solutions)

91. A man distributes his property of ₹900,000 among his two sons, Suraj and Rajiv and his daughter Meera. The share of Suraj is thrice that of Rajiv and the share of Rajiv is twice that of Meera. How much did Meera get?

- A ₹100,000
- B ₹300,000
- C ₹85,557
- D ₹200,000

**Answer:** A

**Explanation:**

Let share of Meera = Rs.  $x$

$\Rightarrow$  Rajiv's share = Rs.  $2x$  and Suraj's share = Rs.  $6x$

Total =  $x + 2x + 6x = 900,000$

$\Rightarrow x = \frac{900,000}{9} = \text{Rs. } 100,000$

$\Rightarrow$  Ans - (A)

92. Amit borrows ₹7,000 at simple interest from the village money-lender. At the end of 3 years, he again borrows ₹3,000 and closes his account after paying ₹4,615 as interest after 8 years from the time he made the first borrowing. What is the rate of interest?

- A 7.5%
- B 5.5%
- C 6.5%
- D 5.6%

**Answer:** C

**Explanation:**

Let rate of interest be  $r\%$

Amit borrows Rs. 7000 for 3 years and Rs. 10,000 for 5 years

$$\text{Simple Interest} = \frac{P \times R \times T}{100}$$

$$\text{Total interest paid} = \left( \frac{7000 \times r \times 3}{100} \right) + \left( \frac{10,000 \times r \times 5}{100} \right) = 4615$$

$$\Rightarrow 210r + 500r = 4615$$

$$\Rightarrow r = \frac{4615}{710} = 6.5\%$$

\(\Rightarrow\) Ans - (C)

93. Given 'y' is a natural number, how many values of 'y' are possible for  $(y^2 - 5y + 5)^{(y-8)(y+6)} = 1$ ?

A 4

B 1

C 3

D 2

**Answer: C**

**Explanation:**

$$\text{Expression : } (y^2 - 5y + 5)^{(y-8)(y+6)} = 1$$

$$\Rightarrow \log(y^2 - 5y + 5)^{(y-8)(y+6)} = \log(1)$$

$$\Rightarrow (y - 8)(y + 6)\log(y^2 - 5y + 5) = 0$$

Thus, either  $(y - 8) = 0$  or  $(y + 6) = 0$  or  $\log(y^2 - 5y + 5) = 0$

$$\Rightarrow y = 8, -6 \text{ -----(i)}$$

$$\text{or } \log(y^2 - 5y + 5) = \log(1)$$

$$\Rightarrow y^2 - 5y + 4 = 0$$

$$\Rightarrow (y - 4)(y - 1) = 0$$

$$\Rightarrow y = 4, 1 \text{ -----(ii)}$$

From equations (i) and (ii), Possible values of  $y$  (natural number) = 3

\(\Rightarrow\) Ans - (C)

## XAT Free Mock Test

94. Find the value of  $\log_2 \log_2 \log_3 \log_3 27^3$

A 0

B 0.5

C 2

D 1

**Answer: A**

**Explanation:**

$$\text{Expression : } \log_2 \log_2 \log_3 \log_3 27^3$$

$$= \log_2 \log_2 \log_3 \log_3 (3)^9$$

$$= \log_2 \log_2 \log_3 9$$

$$= \log_2 \log_2 \log_3 (3)^2$$

$$= \log_2 \log_2 2$$

$$= \log_2 1 = 0$$

=> Ans - (A)

95. In how many ways 9 friends - Alok, Badal, Carol, Dorothy, Emily, Frank, Govind, Harish and Indivar; be divided equally into 3 groups?

A 1296

B 1280

C 280

D 362880

**Answer: C**

**Explanation:**

Group 1 Can be selected in  $C_3^9 = \frac{9 \times 8 \times 7}{1 \times 2 \times 3} = 84$  ways

Group 2 Can be selected in  $C_3^6 = \frac{6 \times 5 \times 4}{1 \times 2 \times 3} = 20$  ways

Group 3 Can be selected in  $C_3^3 = 1$  way

=> Total number of ways =  $\frac{84 \times 20 \times 1}{3!}$

=  $14 \times 20 = 280$  ways

=> Ans - (C)

96. Two sets AA and BB are defined as follows:-

$$AA = \{x \mid x \in N, x < 5\}$$

$$BB = \{x \mid x \in N, x^2 < 25\}$$

Which of the following alternatives is correct?

A  $AA = BB$

B  $n(AA) > n(BB)$

C  $n(AA) < n(BB)$

D  $n(AA) \leq n(BB)$

**Answer: A**

**Explanation:**

$$AA = \{x \mid x \in N, x < 5\}$$

$$\Rightarrow AA = \{1, 2, 3, 4\}$$

$$BB = \{x \mid x \in N, x^2 < 25\}$$

$$\Rightarrow BB = \{1, 2, 3, 4\}$$

Thus, both sets contain same elements, hence  $AA = BB$

=> Ans - (A)

[Download IIFT Previous Papers PDF](#)

**Data Interpretation**

Instructions [97 - 98]

Read the following table and answer questions that follow:-

**Accounting Information of Two Sectors**

	Cement		Pharmaceuticals	
	2014	2015	2014	2015
Sales	3018	3137	1949	2210
Expenditure	2628	2708	1652	1850
Interest	312	312	67	66
Depreciation	204	193	48	65
Net Profits	16	-10	198	220

97. If 2014 figures for Cement are plotted on a pie-chart, approximately what angle will be sub-divided by 'Expenditure'? (in degrees)

- A 120
- B 90
- C 150
- D 180

**Answer: C**

**Explanation:**

From the table,

Expenditure for Cement in 2014 = 2628

$$\begin{aligned} \therefore \text{Angle sub-divided by Expenditure in the pie-chart} &= \frac{2628}{3018+2628+312+204+16} \times 360^\circ \\ &= \frac{2628}{6178} \times 360^\circ \\ &= 153^\circ \\ &= 150^\circ \text{ (approximately)} \end{aligned}$$

**CAT Previous Papers PDF**

98. Taking Interest and Net Profits for both sectors together, what is the percentage change in 2015 over 2014?

- A 2% increase
- B 2% decrease
- C 1% decrease
- D 1% increase

**Answer: C**

**Explanation:**

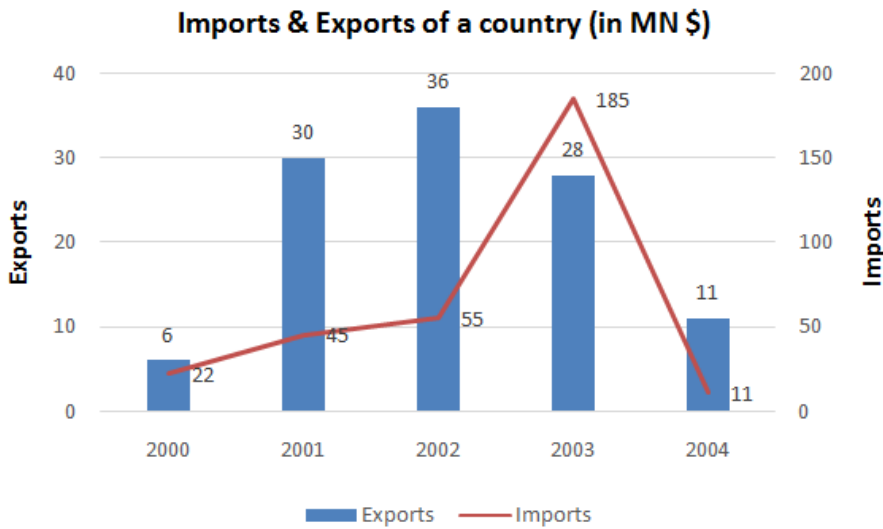

Total interest and net profit in 2014 = 312+67+16+198 = 593

Total interest and net profit in 2015 = 312-10+66+220 = 588

Percentage change = 5/593 = 1 % decrease

99. Study the following graph carefully and answer the question that follows:-

The percentage increase in exports from 2000 to 2001 is:-

- A 4
- B 400
- C 40
- D 440

**Answer: B**

**Explanation:**

From the graph,

Exports in 2000 = 6

Exports in 2001 = 30

$$\therefore \text{The percentage increase in exports from 2000 to 2001} = \frac{30-6}{6} \times 100 = \frac{24}{6} \times 100 = 400\%$$

100. The bar-diagram given below shows the realization from leather exports in \$ during different years:-

In which year did the exports of leather fall the most?

- A Year 7
- B Year 4
- C Year 3

**D** Year 6

**Answer: C**

**Explanation:**

In year 4, year 6 and year 7 there is rise in the exports of leather. Only in the year 3, there is fall in the exports of leather.

∴ In year 3, the exports of leather fall the most.

Hence, the correct answer is Option C

## XAT Previous Papers PDF

**Instructions [101 - 102]**

Read the following case and answer the following question:-

Mr. Techno has recently acquired four companies namely A-Net Technologies (ANT), B-Anta Transport (BAT), C-Antra Tailors (CAT) and D-Ali Transistor (DAT). When the results of the companies for the year 2013-14 were placed before him, he found a few interesting things about them. While the profits of CAT and DAT were same, the sales of CAT were the same as those of BAT, profits of ANT were 10% of its sales, where as the profits of BAT were 20% of its sales. While the total expenses of CAT were 5 times its profits, sales of DAT were three times its profits. The total expenses of CAT were ₹10,00,000. The total expenses of ANT were 10% less than those of CAT. (Profits are defined as the difference between sales and total expenditure)

101. Which company had the highest profits during the financial year 2013 - 14?

**A** BAT

**B** DAT

**C** ANT

**D** CAT

**Answer: A**

**Explanation:**

Sales. Expenditure. profit

ANT - 10,00,000. 9,00,000. 1,00,000

BAT - 12,00,000. 9,60,000. 2,40,000

CAT - 12,00,000 10,00,000. 2,00,000

DAT - 6,00,000 4,00,000 2,00,000

102. Which company had the lowest sales during the financial year 2013-14?

**A** BAT

**B** CAT

**C** DAT

**D** ANT

**Answer: C**

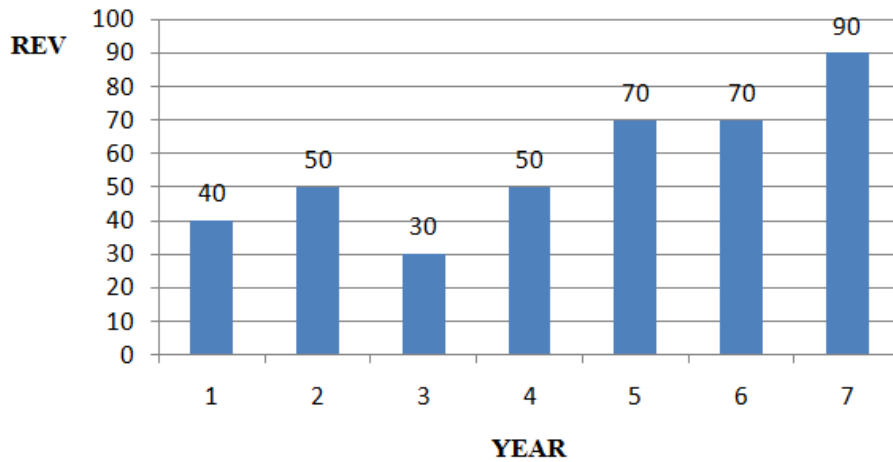

**Explanation:**

Sales.	Expenditure.	profit
ANT - 10,00,000.	9,00,000.	1,00,000
BAT - 12,00,000.	9,60,000.	2,40,000
CAT - 12,00,000	10,00,000.	2,00,000

Instructions [103 - 104]

The bar-diagram given below shows the realization from leather exports in \$ during different years:-

**Realization from Leather Exports**

103. In which year was the percentage increase over the previous year the highest?

- A Year 5
- B Year 4
- C Year 6
- D Year 2

**Answer: B**

**Explanation:**

Percentage increase in year 5 =  $20/50 = 40\%$

Percentage increase in year 4 =  $20/30 = 66.66\%$

Percentage increase in year 6 = 0

Percentage increase in year 2 =  $10/40 = 25\%$

**Top-500 Free CAT Questions (With Solutions)**

104. What is the ratio of the exports in the year 3 and year 7 approximately?

- A 1 : 2
- B 2 : 1
- C 1 : 3
- D 3 : 1

**Answer: C**

**Explanation:**

From the graph,

Exports in year 3 = 30

Exports in year 7 = 90

∴ The ratio of the exports in the year 3 and year 7 =  $30 : 90 = 1 : 3$

105. Read the following case and answer the following question:-

Mr. Techno has recently acquired four companies namely A-Net Technologies (ANT), B-Anta Transport (BAT), C-Antra Tailors (CAT) and D-Ali Transistor (DAT). When the results of the companies for the year 2013-14 were placed before him, he found a few interesting things about them.

While the profits of CAT and DAT were same, the sales of CAT were the same as those of BAT, profits of ANT were 10% of its sales, where as the profits of BAT were 20% of its sales. While the total expenses of CAT were 5 times its profits, sales of DAT were three times its profits. The total expenses of CAT were ₹10,00,000. The total expenses of ANT were 10% less than those of CAT. (Profits are defined as the difference between sales and total expenditure) In the financial year 2013-14, which company had the highest total expenses?

- A ANT
- B BAT
- C CAT
- D DAT

**Answer: C**

**Explanation:**

Sales. Expenditure. profit

ANT - 10,00,000. 9,00,000. 1,00,000

BAT - 12,00,000. 9,60,000. 2,40,000

CAT - 12,00,000 10,00,000. 2,00,000

DAT - 6,00,000 4,00,000 2,00,000

**Instructions [106 - 108 ]**

Number of five different types of product X, viz: AA, BB, CC, DD and EE produced and the number of products found defective by a Company ABC Ltd. over the years from 1996 to 2002 are given below (in '000):-

**Production Details from 1996 - 2002**

Year	AA		BB		CC		DD		EE		Total	
	Produced	Defective	Produced	Defective	Produced	Defective	Produced	Defective	Produced	Defective	Produced	Defective
1996-97	480	20	210	12	620		540	8	780	22	2630	62
1997-98	640	18	360	16	470	18	620	10	590	11	2680	
1998-99	520	12	290	8	358	9	470	9	610	12		50
1999-00	490	11	300	10	405	12	395		520	14	2110	47
2000-01	700	14	500		515	13	465	11	602	18	2782	72
2001-02	580		418	12		11	600	12	710	20	2828	70

106. What was the percentage increase in the number of defect-free EE type produced in 2001-02 from that in 2000-01?

- A 12%
- B 18%
- C 120%
- D 118%

**Answer: B**

**Explanation:**

Defect-free EE type produced in 2000-01 = 602 - 18 = 584

Defect-free EE type produced in 2001-02 = 710 - 20 = 690

$$\% \text{ increase} = \frac{690 - 584}{584} \times 100 \approx 18\%$$

Answer is option B.

## Take a XAT Free Mock Test

107. In which of the following years was the percentage of defective of AA type the maximum?

- A 1996-97
- B 2000-01
- C 1998-99
- D 1997-98

**Answer:** A

**Explanation:**

Total defective products of AA in 2001-02 =  $70 - (12+11+12+20) = 15$

Percentage of defective for AA in 1996-97 =  $(20/500) \times 100 = 4\%$

Similarly, we can calculate this percentage for other years also after which we find that the percentage defective is maximum for the period 1996-97.

108. The production of AA type in 1998-99 is what percent of the total defect-free production in that year?

- A 23.7
- B 22.6
- C 23.1
- D 22.3

**Answer:** A

**Explanation:**

Total production of AA in 1998-99 = 520

Defect-free production in 1998-99 =  $461 + 598 + 349 + 282 + 508 = 2198$

Required % =  $\frac{520}{2198} \times 100 = 23.65\%$

Answer is option A.

## Take a CMAT free mock test

### Verbal Ability & Reading Comprehension

109. Find the odd word.

Lovely, slowly, quickly, skilfully

- A Lovely
- B Quickly
- C Skilfully
- D Slowly

**Answer:** A

**Explanation:**

Here, "slowly", "quickly" and "skillfully" are all adverbs, whereas "lovely" is an adjective.

Hence, the answer is option A.

**Take a free SNAP mock test**

110. **Fill in the blank.**

I \_\_\_\_\_ already \_\_\_\_\_ many bad experiences in my life.

- A** have, had
- B** had, have
- C** has, had
- D** have, has

**Answer:** A

**Explanation:**

The sentence is written in the present perfect tense.

The present perfect form of 'have' is 'have had'.

Hence, the answer is option A.

111. **Match the idioms to their meanings.**

Column A	Column B
1. Dead ringer	a. Mental institution
2. Dry run	b. Living in luxury
3. Funny Farm	c. Duplicate
4. High on the hog	d. Rehearsal

- A** 1-a, 2-b, 3-c, 4-d
- B** 1-c, 2-d, 3-a, 4-b
- C** 1-d, 2-a, 3-b, 4-c
- D** 1-b, 2-c, 3-d, 4-a

**Answer:** B

**Explanation:**

high on the hog - living in luxury

funny farm - mental institution

Correct sentence - He was given a medal for proving his mettle.

The answer is option C.

## CAT Previous Papers PDF

### Instructions [137 - 141]

#### READING COMPREHENSION:

We always wonder what it would be like if famous public figures like Lady Diana, Mahatma Gandhi and even infamous ones like Osama Bin Laden, had a blog or website with direct links to their thoughts, views, opinions, presentation and positioning. How would Lady Di have wanted to portray herself? What would her blog carry? Would it have helped her multiply her work and effect? This article discusses about the need for public figures to have a website.

Whether you are a politician, artiste, actor, religious figure or anyone who enjoys public fame, engaging directly with your followers, fan base or disciples is imperative. Having an unfiltered and open medium of disbursing information allows the public figure to be as candid and genuine and s/he can be. He or she has full control over what is being edited and what should be edited when communicating through a medium over which they have direct control.

More than spread news and promote your work, as a celebrity you will need to constantly clarify misconceptions and miscommunication about yourself. Being in the public eye means you are sure to receive healthy criticism and even slander. Having your own communication medium helps you to directly reach out to those who are concerned about you and your actions. Many celebrities have clarified and cleared up important rumours and misconceptions about themselves, which have either been spread by their rivals or have been cooked up by the mainstream media. Many actors have used their website to clarify their marital status or rumours about their death which were floating around in the media. Politicos and Intellectuals have used their websites to stir up emotions and gather support for fulfilling their ambitions.

Most celebrities and public figures love the attention they get wherever they go. Most celebrities like to send messages and subtle hints about their next public appearance, so that their bandwagon of cheerleaders and fans is ready and waiting to welcome them. Social Media and the Internet have made it so much easier for celebs to post their next hangout and mobilize a crowd of fans in a few minutes. Politicians may especially find this useful when wanting to garner support for their various campaigns and promo trails.

A website can be an excellent source of revenue generation, especially when a celebrities have their own range of products or line of exclusive merchandise for sale. People clamour to get authentic merchandise and connect at that level with their idol or hero. Many actors and artistes have launched their own brand of products - things which they use or endorse. For example many actors have launched their own perfume brand, whereas painters and sculptors have launched a line of tools or implements that they use for their art. Similarly, clothing and apparel is also often endorsed or promoted in the name or presence of an actor. A website can definitely help boost their merchandise sales and provide a source for people to get the authentic stuff , without having to be exploited by ripoffs or expensive stores.

137. **Politicos and intellectuals use their website to \_\_\_\_\_.**

- A provoke emotions
- B gather information
- C promote themselves
- D spread awareness

**Answer: A**

**Explanation:**

In third paragraph it is mentioned that Politicos and Intellectuals have used their websites to stir up emotions and gather support for fulfilling their ambitions. This infers that they used to provoke emotions.

The answer is option A.

138. **What does being in a public eye mean?**

- A to create a fan database.
- B to have an open line of two-way communication.
- C to be open to positive and negative criticism.
- D to mobilize the crowd.

**Answer: C**

**Explanation:**

In third paragraph it is mentioned that being in the public eye means you are sure to receive healthy criticism and even slander. This infers that being in the public eye means to be open to positive and negative criticism.

The answer is option C.

139. **What, according to the author, can a website also be?**

- A Platform for criticism.
- B Space to begin a campaign.
- C Link between stars and their fans.

**D** Source of revenue generation.

**Answer:** D

**Explanation:**

In the last paragraph, it is mentioned that a website can be an excellent source of revenue generation, especially when a celebrities have their own range of products or line of exclusive merchandise for sale.

The answer is option D.

## XAT Previous Papers PDF

140. **What, according to the author, is necessary for a public figure?**

- A** Keeping a clean image in front of their fans.
- B** Promoting their 'brand'.
- C** Direct interaction with the followers.
- D** Clarifying misconceptions about themselves.

**Answer:** C

**Explanation:**

In second paragraph it is mentioned that whether you are a politician, artiste, actor, religious figure or anyone who enjoys public fame, engaging directly with your followers, fan base or disciples is imperative.

The answer is option C.

141. **What is the passage about?**

- A** The usage of websites by celebrities.
- B** The need of websites for celebrities.
- C** Promotion of celebrities via websites.
- D** Celebrities gaining fan following through websites.

**Answer:** B

**Explanation:**

It is mentioned in the first paragraph that this article discusses about the need for public figures to have a website.

Therefore, the answer is option B.
