Question Numbers : (81 to 85)

**Read the passage given below and answer the questions that follow (81-85)**

Why do people from different cultures sometimes have misunderstandings or conflicts? Because they can interpret the same thing differently. Some behaviours that are polite in one culture can seem rude in another culture. Clothing that is very nice in one cultural context can be entirely inappropriate in another.

Gestures and actions take on symbolic meaning when interpreted through a cultural lens. Greetings, for example, vary widely from culture to culture. How should you greet a particular person? Do you shake hands? Wave? Give a kiss on the cheek? Is a hug appropriate? Do you bow? The rules vary widely around the world. Interculturally competent people will adjust their behaviour according to the context they find themselves in.

Greetings are fairly formulaic. The right way to greet different kinds of people can usually be described in a few rules. Other cultural differences are more general and are the result of differences in values. We must take note of one such difference: the difference between high-context and low context cultures. As you will remember, most cultures in Latin America, the Middle East, and Asia are high context cultures.

**For each of the following questions, choose the best option**
